CASH IN ON CHAOS NEWSLETTER - January 28, 1999- 99-1

Dr. Hans Hannula, voice 303-452-5566, fax 303-457-9871, email allanson@cashinonchaos.com

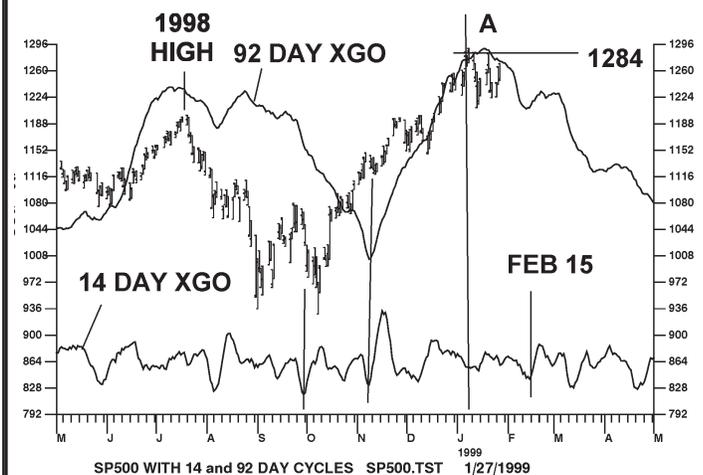

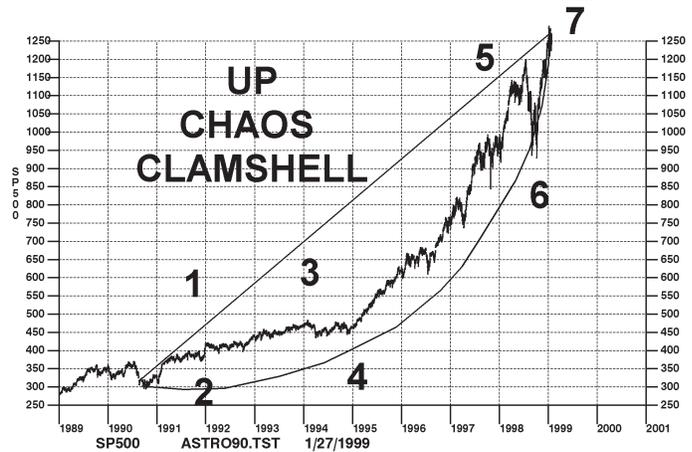

Stocks may have made high for the year. Tbonds are past their high. Swiss Franc switched gears and heads south. Gold weakens. Economy holding. Wheat still making historic bottom. The NODE KNOWS. World markets weaker but the Japan rallies. 1999 forecast. Quality improvement focuses on EPI.

STOCKS

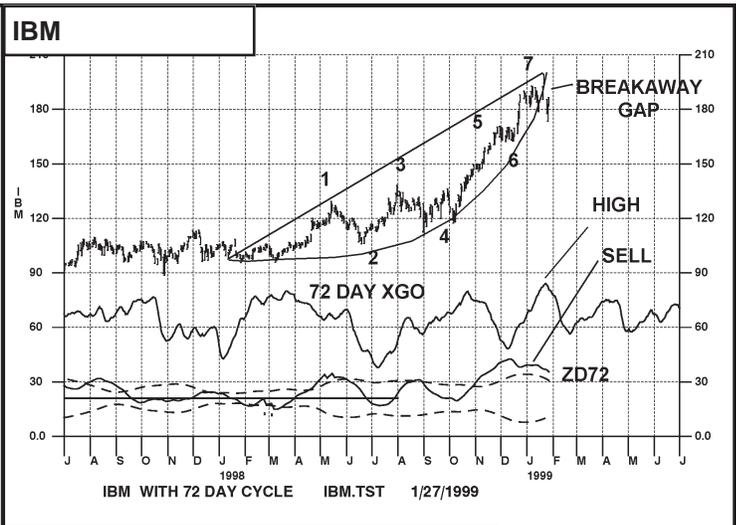

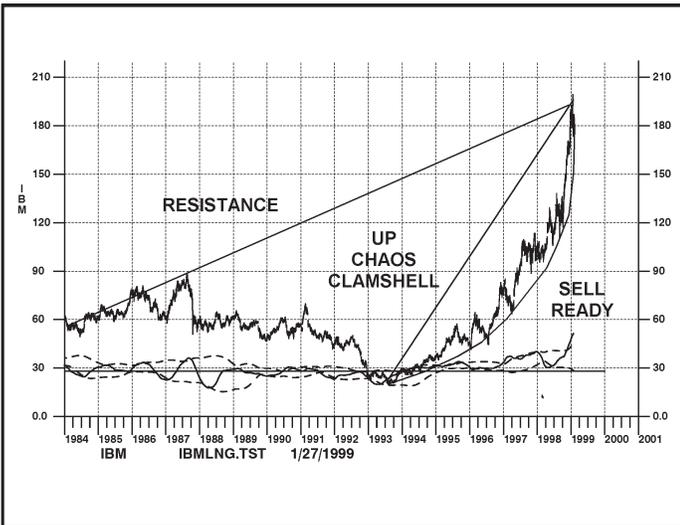

Stocks have made a high early in the year and are showing weakness. We may have seen the high for the year. We recommend that investors be out of stocks and traders be short.

The long term chart shows the multi-year up Chaos Clamshell. The rally up from the October lows look like a typical move 7 blowoff. The drop from that type move will be similar to the drop from the move 5 high to the move 6 low. It will start out slow and choppy and then accelerate.

The near term chart shows both a 92 day ZD filtered XGO and a 14 day ZD filtered XGO. The 92 day pattern shows that we are at a quarterly high, having met resistance at the key price level at 1284. This will be discussed more later in the newsletter. The next move appears to be down into a low near February 15th or 16th. February 16th is a solar eclipse. January 31st is a lunar eclipse. Markets frequently move sharply between those two eclipses. Traders are currently short. Check the hotline for updates.

This letter is written by Dr. Hans Hannula, full time trader, PhD (Electrical and Computer Engineering), RSA, CTA. It incorporates his original scientific research into market chaos, its causes, patterns, and trading techniques. The Chaos Clamshell shown is the unclassified version of the confidential **Hannula Market Fractal**, which is taught in his **Cash In On Chaos** course. **Hotline updates to this letter are give at 7 PM Eastern, 1-900-776-7272, \$2 per minute for 2-3 minutes,\$6-8 total.** See page seven for more details.

IBM looks to have completed a spectacular blowoff to it's long term up Chaos Clamshell. The long term shows that this blowoff met resistance at a trend line along the highs of 1984 through 1987. Such long term resistance lines can be very powerful.

The near term chart shows a possible up CC reaching a high coincident with the high in the 72 day ZD filtered XGO. The ZD72 price cycles has given a sell signal. This was accompanied with a breakaway gap to the downside. Such gaps mark the entry into a new chaos domain of behavior.

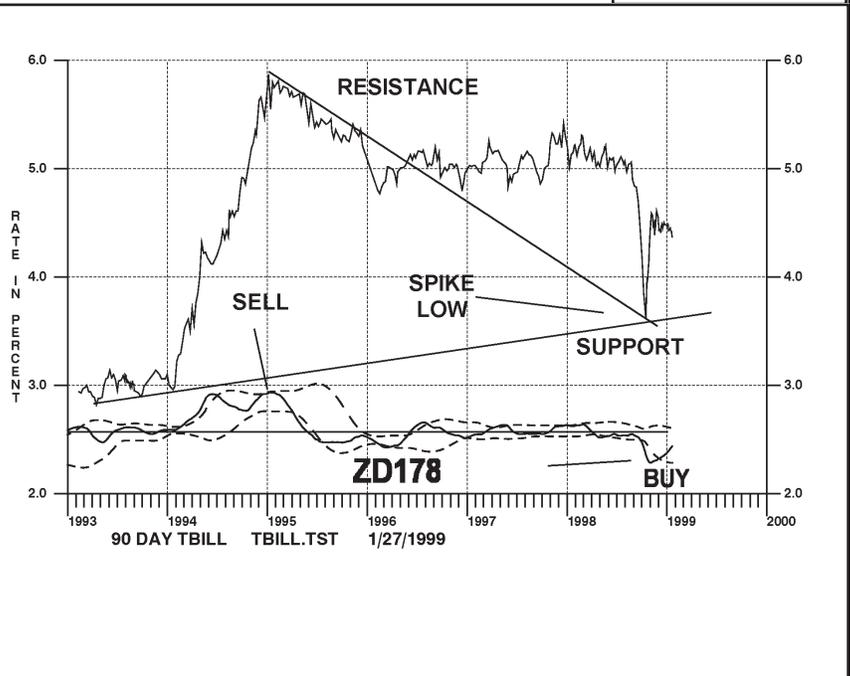

For stocks or commodities not covered in this newsletter or on the hotline, you can track the cycles and trade the Chaos Clamshells using the **Trading System Toolkit**.

ECONOMY/RATES

Interest rates have given a buy signal on the ZD178. The chart at the right shows the interest rates with an expanded scale. When this chart was re-scaled it was clear that the spike low late in 1998 completed a triangle pattern and came off of a support line which goes back 1993. In early '95 the ZD178 cycle gave a sell signal. Now, it has given a buy signal. The interesting thing about this is that the ZD178 tracks the eclipse cycle. This is significant because we are entering into the January 31st lunar eclipse and the February 16th solar eclipse. So be alert for some negative news on the interest rate front.

The world economy continues to be of concern to many investors. Brazil recently devalued its currency after swearing that it would not do so. That event spurred a number of presentations by members of the Board of the Federal Reserve. They all claim that Brazil has a small impact upon the US economy. While that may be true in a pure dollar sense, the fact that many countries around the world are struggling has a negative effect upon the growth prospects for the US economy. Further, the propping up and bailing out of these struggling economies will divert capital from the pursuit of new business opportunities to the repair of past bad decisions.

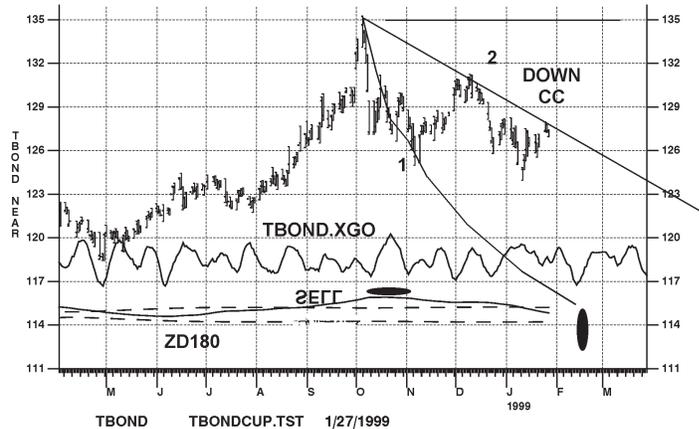

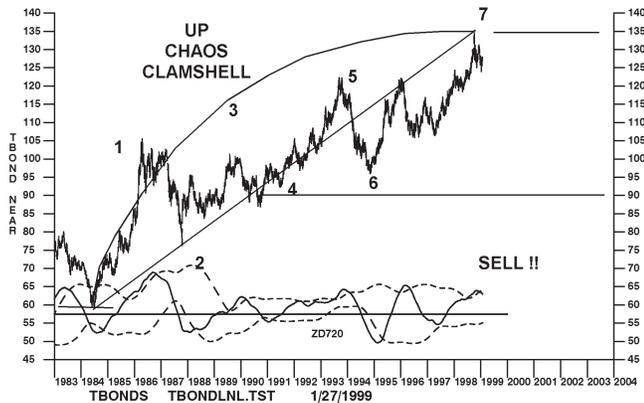

It is widely believed that the year 2000 computer problems will lead to a recession. It has become a popular theme in brokerage house newsletters. The market tends to discount coming events many months in advance, so it may well discount the year 2000 recession by declining in 1999. This is a risky time to be holding equities. Prices are unreasonably high and the risk is high. Investors should be out of equities. Wait for a better chance to buy them.

Man's mind, once stretched by a new idea, never regains its original dimensions.

Oliver Wendell Holmes

TBONDS

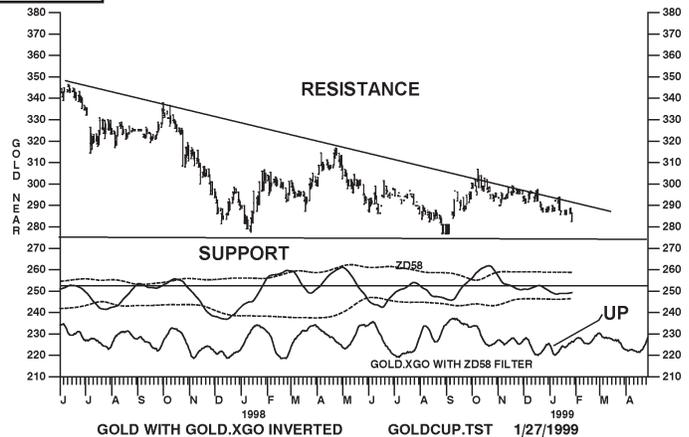

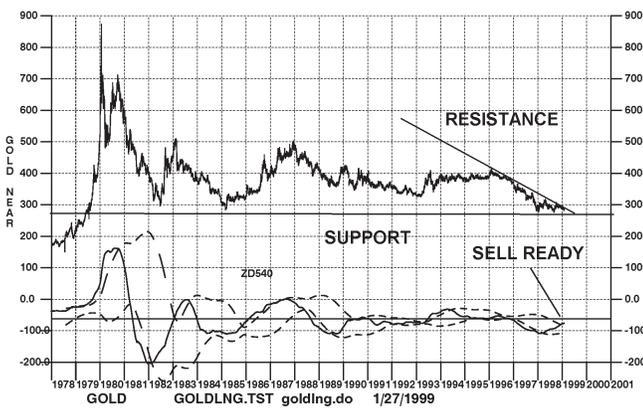

Tbonds are falling away from their historic high made late last year. The long term chart shows that the ZD720 has given a sell signal. Five similar sell signals are shown on the chart. Each of them led to an 18 month decline in bond prices.

The near term chart shows that the ZD180 gave a signal in October coincident with the high at 135. From there prices have started a new down CC, which has been following the TBOND.XGO fairly well. That energy input now shows a drop into the February solar eclipse low.

Do not follow where the path may lead.
Go instead where there is no path and leave a trail.

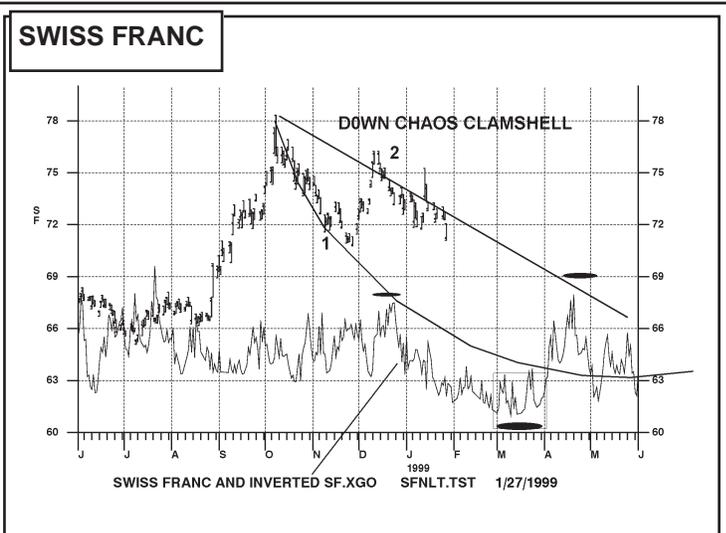

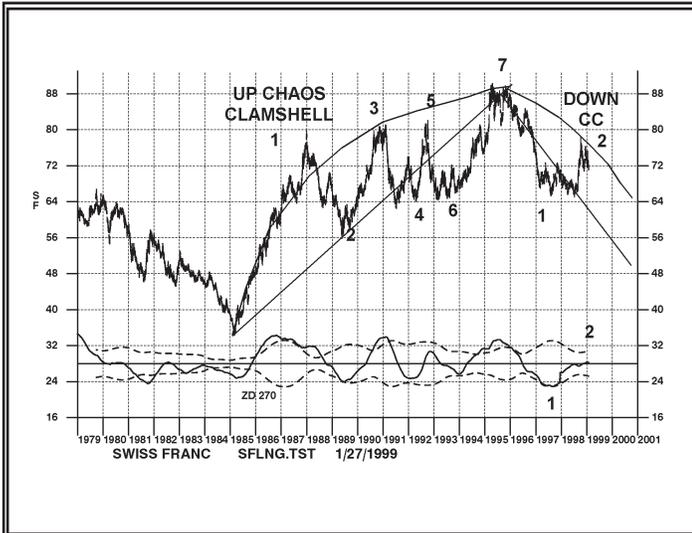

Unknown

GOLD

Gold continues to trade in a narrow range between the long term support and the long term resistance lines shown on the long term chart at the left. The ZD540 cycle has given a sell signal. This does not necessarily mean that Gold will decline sharply, but it should return to the support level.

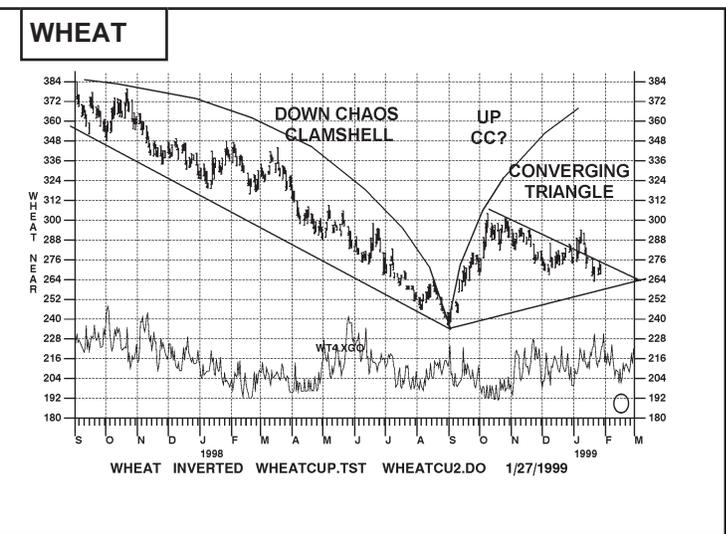

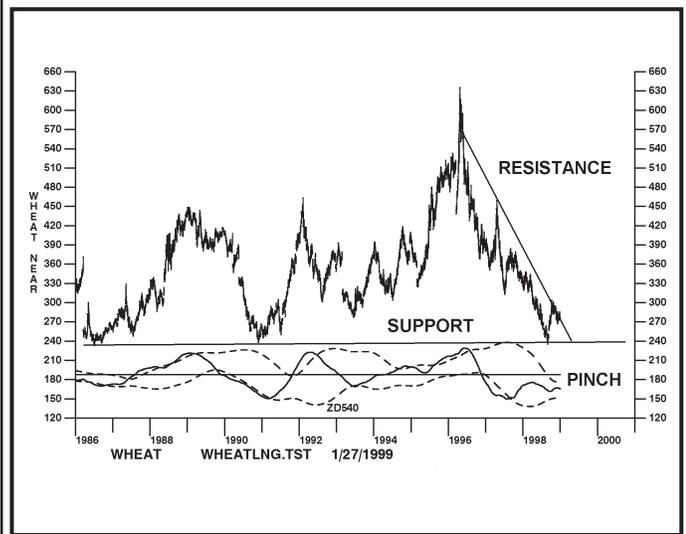

The near term chart shows the ZD58 cycle still headed down, even though the 58 day XGO has been up during January. When the market fails to use its energy input to move in the direction of that input, it is usually a sign that the market is weak. That means that there may be no solid bottom in Gold until April.

The Swiss Franc has run into serious trouble. On the long term chart I have reverted to my earlier analysis which said that the up Chaos Clamshell reached the top in 1995. That long term chart shows a new down CC, which looks like it has reached the end of a move 2 up. This may be weakness due to the appearance of the Euro, or it may merely be reflecting economic conditions. The Swiss Franc shows many 18 month swings, which includes the swing up from the 1997 low.

The near term chart shows a down Chaos Clamshell and the inverted Swiss Franc XGO function. That function is down sharply into March. Traders have a sell stop just under the market. Check the hotline for updates.

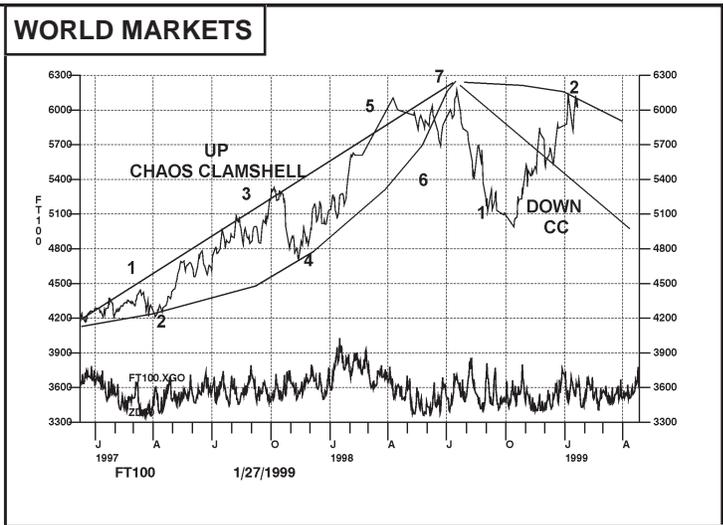

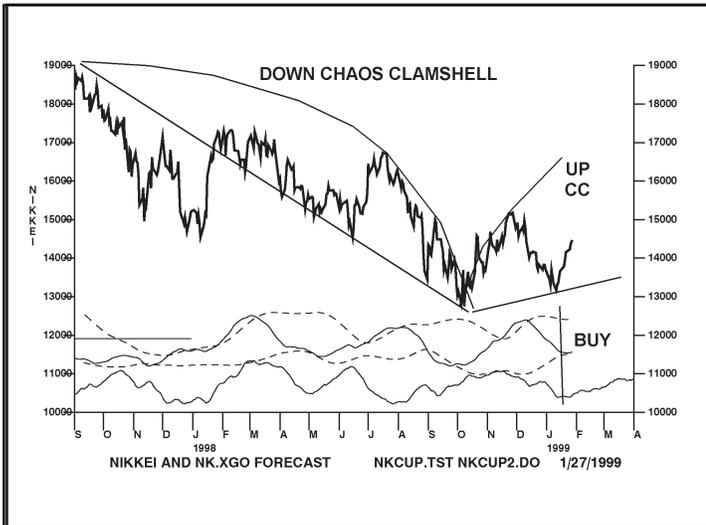

The future belongs to those who believe in the beauty of their dreams.
Eleanor Roosevelt

Wheat is still "boxed into the corner" on the long term chart. The downward resistance line is being pressured. The support is holding.

The near term chart shows that wheat has formed a converging triangle since making its highs months ago. That triangle reaches its apex near the end of February. The energy function for wheat shows a low mid-February. Wheat is particularly sensitive to eclipses, so watch for a rally to gain energy after the solar eclipse.

George Bayer wrote about trading wheat using Mercury, Saturn and Jupiter. You can learn to find astrocycles with the aid of the **Trader's Ephemeris** and the **Finding Astrocycles** video-**JUST \$99.**

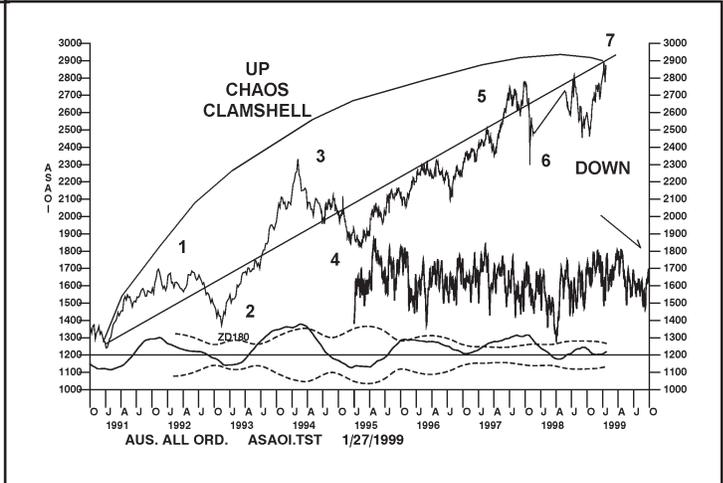

The Japanese market has rallied off of its low. I managed to catch this rally on our hotline. The trade is doing well. It appears that the Japanese market has started a new up Chaos Clamshell. There is a spreading belief that the Japanese efforts to fix their economy are finally paying off.

Meanwhile the British market looks to have made a double top and be starting a new down CC.

The Australian market has similarly topped. There is divergence between its ZD180 line and prices. This is usually bearish. Further, the energy function is down sharply over the next several months.

The world economy continues to be mixed.

ASTROPHYSICS AND CHAOS THEORY

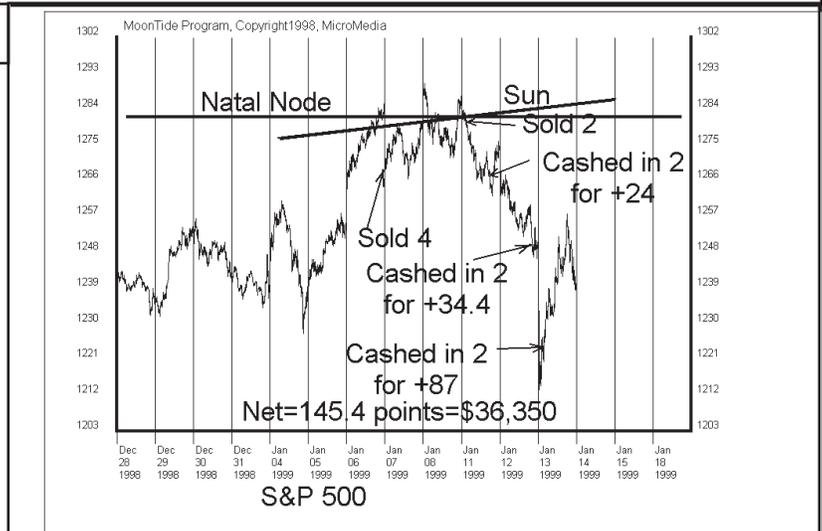

One reason for studying the natal chart of stocks or commodities is to find key points in their cycle of the year. Transients of the natal points by the Sun are often key turning points.

This is especially true of the S&P500, where the Sun transits the natal Node position near January 8th. That frequently sets a turning point, which sets the tone for the year. For example, last year that point was a clear low, and the market rallied for the next six months.

This year that point was a high and the market has declined from that point.

The chart here shows how prices rallied up to the intersection of the natal Node line and the Sun line. We were fortunate on our hotline to leave this aspect short 6 contracts. We progressively cashed in those contracts for a quick profit of over \$36,000.

Research and study does pay off. You have to learn to earn.

CHAOS CLASSROOM

The chart at the right shows my annual forecast for 1999. It is based upon the Zero Delay filtered XGO for the S&P.

At the bottom of the chart is a graph showing the Moon's inclination. The Moon tends to ride high or low in the sky at major market turns. For example the Moon was high at point A and three swings later made a low at point B. Seven swings later the market is showing topping at C.

That peak occurred on January 13th. The Ephemeris wheel for that date is shown in the first box under the chart. It shows the Sun opposing the natal Node squared by Mars and Saturn. Saturn is transiting the S&P natal Sun while Mars is transiting the S&P natal Pluto.

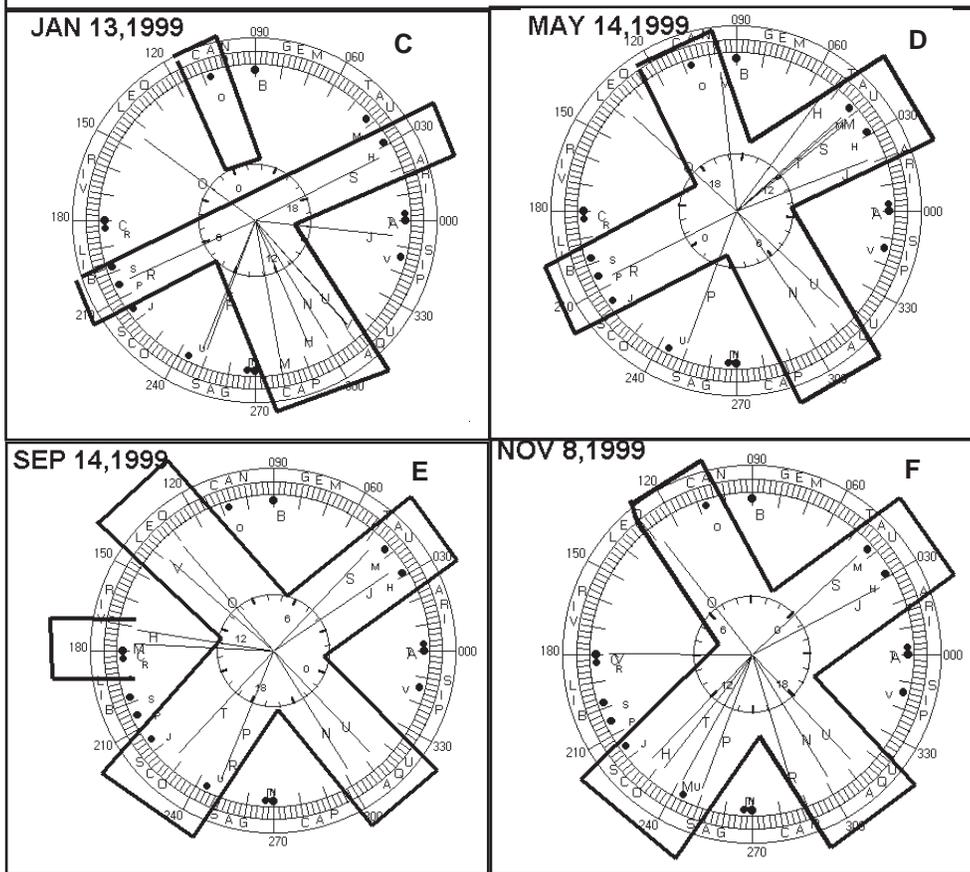

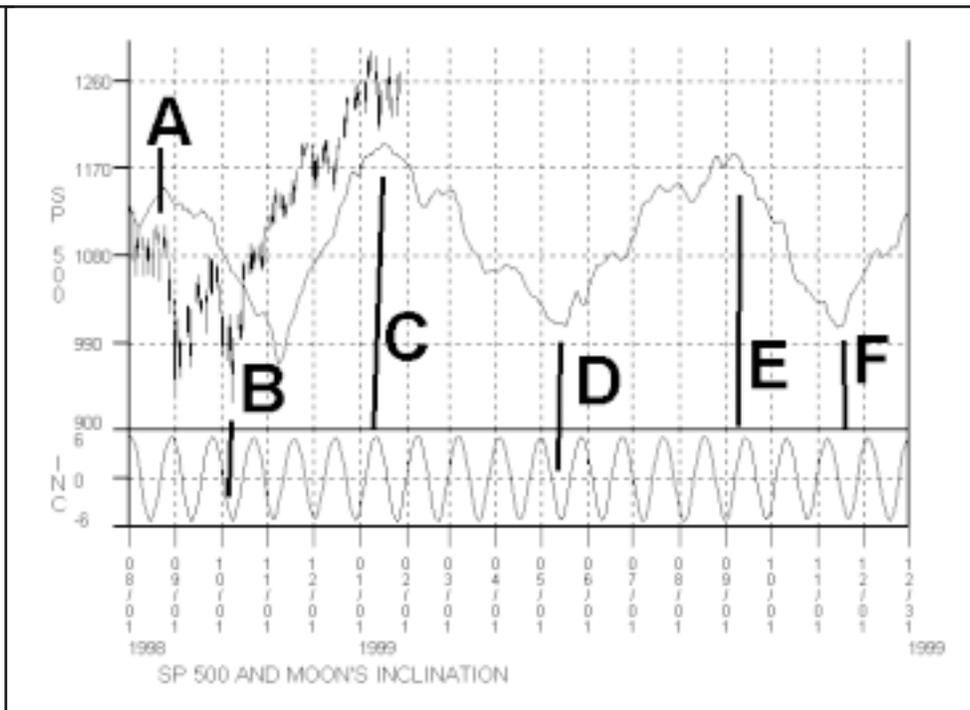

This pattern of squares is why I picked a 92 day cycle length for the ZD filter. 92 days is one-fourth of a year. The next significant point in the 92 day XGO cycle is May 14th where the Moon is riding low after nine swings. The second box shows the Ephemeris wheel for that. It shows the Moon, Mercury, and Earth passing the S&P's natal Mercury. Note that this part of the chart is under the continued influence of Jupiter as it moves to conjunct Saturn. A heliocentric conjunction of Saturn occurs in year 2000.

The high at point E is another nine inclination swings up from the low at D. The Ephemeris wheel for that date shows Mercury conjuncting the Sun while Venus conjuncts the Node, opposing Neptune and Uranus, as the Moon opposes Saturn and Jupiter.

The low in November at F may be November 8th or one week later.

The Ephemeris wheel is drawn for November 8th where Sun, Mercury and Moon conjunct Pluto as they square the Node and oppose Saturn and Jupiter. Mars, Neptune, and Uranus form the other leg of a loose square.

That's the forecast. Time will tell us how it turns out.

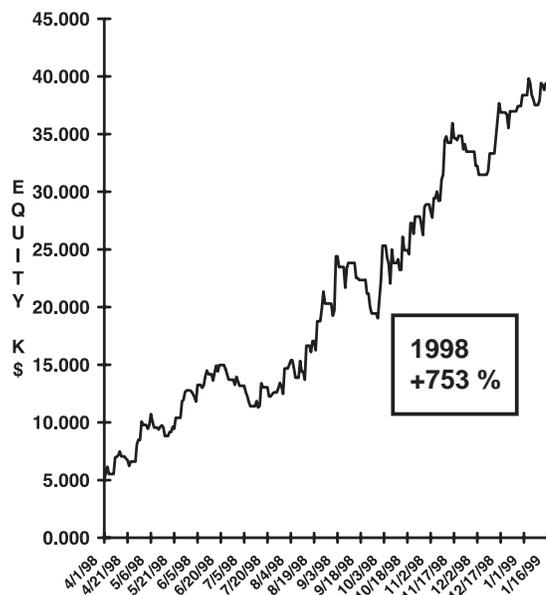

QUALITY IMPROVEMENT

I continue to focus on quality improvement activities by moving our business to 100% Electronic, Paperless, Internet (100% EPI). We have a new bulk email program installed on our web server and we will be testing it by emailing all subscribers an electronic form of this newsletter. Of course, we can only email it to you if you have provided us with an email address. So if you don't see the newsletter and you have not sent us an email address to email it to, please do so. Send addresses to wava@moneytide.com.

It is our intent to eventually complete this transition to 100% electronic, paperless, Internet. Sometime in the future this newsletter will be available only in electronic form.

PEOPLE AND HAPPENINGS

We enjoyed a nice Christmas vacation and hope you did as well. Now we are ready for a brand new year. My Denver Broncos are back in the Super Bowl. I hope they do better this year than they did last year, where they just squeaked out

a victory. The signs are that they will win. I enjoyed a nice visit over the holidays with JP. He is doing some interesting work in energy based alternative medicine. We also have had many discussions, especially about our MoonTide based S&P Day Trading. We have a new version of the MoonTide program which can also plot the Face Of God pattern. We hope to release that within the month.

I received several copies of the chaos cartoon that appeared in the Zits comic strip. Thank you, JS and others. I also got word from Bill Meridian that his second edition of his book, "Planetary Stock Trading" is out. You can email Bill at bills@emirates.net.ae. Bill uses first trade dates which I use in my XGO program.

I will be speaking at the 11th World Conference of Astro Economics April 24th and 25th in Vancouver. For information contact Grace Morris, email astro@netwave.net.

See you next month. Happy trading!

Hans

ZITS

We did purge addresses last month. If this is a sample newsletter, you will stay on our list until purged. The date after your name tells you the last month you will receive unless you renew. Renewals are \$240/year. Renew now. I do take 3 month and 6 month renewals as well. Just pro-rate the cost. Call 303-452-5566 with your renewal. Visa and Mastercard taken.

The **Cash In On Chaos Newsletter** (formerly the Market AstroPhysics Newsletter) is published 12 times per year, between the 1st and the 25th of the month. Subscriptions are \$250 per year or \$300 to include subscription to the AstroDow and Astropoint timing service. We may or may not hold securities mentioned. Sources of information are believed to be reliable, but are not guaranteed. Opinions and recommendations are given with the understanding that our sophisticated investors are aware of the risks involved. Past success is no guarantee of future success. Simulated trading results may over or understate actual results. MAP Newsletter is written and published by Dr. Hans Hannula, PhD, RSA, CTA. 303-452-5566., fax 303-457-9871. MicroMedia (The Chaos Mint), Box 33071, Northglenn, CO 80233. Mastercard, Visa accepted. Hotline number 1-900-776-7272. \$2 / minute for 2 to 4 minutes. Access from non-900 areas can be arranged by calling 303 224 4441.

Your Electric Life, Science for a New Age
by Dr. Al Lason, Ph.D. (aka Dr. Hans Hannula)

Whether you realize it or not, you are being strongly influenced by a very powerful electrical force - the earth's electric field. This field produces currents through your body that are 250,000 times as strong as the currents that run your brain. Recognition of this fact, research, and experimentation have led former Bell Labs engineer and scientist Al Larson to a series of insights into many previously unexplained phenomena. His findings cover a wide range of topics, such as dowsing, the human aura, consciousness, bio-circuits, Feng Shui, natal astrology, stock markets, remote viewing, energy field medicine, de ja vu, dreams, and religious experiences. His own discovery of *sudden impulses* *shows how we are all connected by the field in a *Cosmic Internet**. Al provides a rational explanation of how these phenomena work through the earth's electric field, along with guidance of how this knowledge can be used to improve your own life. Do not miss this clear, concise, convincing explanation of how things work.
