CASH IN ON CHAOS NEWSLETTER - April 25, 2000- 00-4

Dr. Al Larson, aka Hans Hannula, voice 303-452-5566, fax 303-457-9871, email [allarson@moneytide.com](mailto:allarson@moneytide.com)

**Stocks run out of breath on the Last Hurrah. Tbonds topping. IBM heading lower. Interest rates make short term peak. The Now economy is suddenly tougher. Swiss Franc pulls back from rally. Gold remains weak. Wheat dropping. World markets fall from highs. A good energy exercise. The Drop and the Wheel of Fortune. The Drop and the 6 day MoonTide.**

**STOCKS**

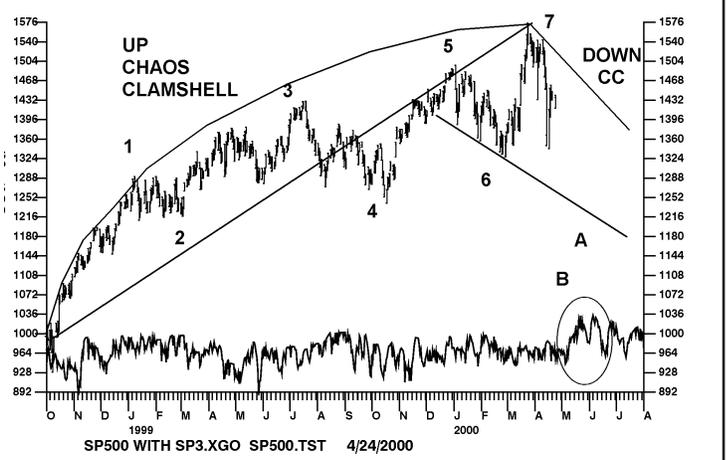

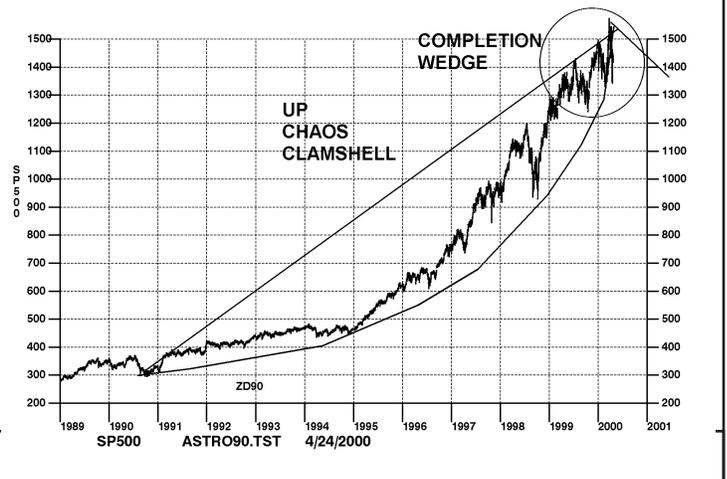

**Stocks collapsed dramatically off of the blowoff rally described last month.**

The long term chart shows that this rally was part of a "completion wedge" pattern. This pattern often occurs at the end of a Chaos Clamshell. Experienced traders will recognize that it also contains "three drives to a top."

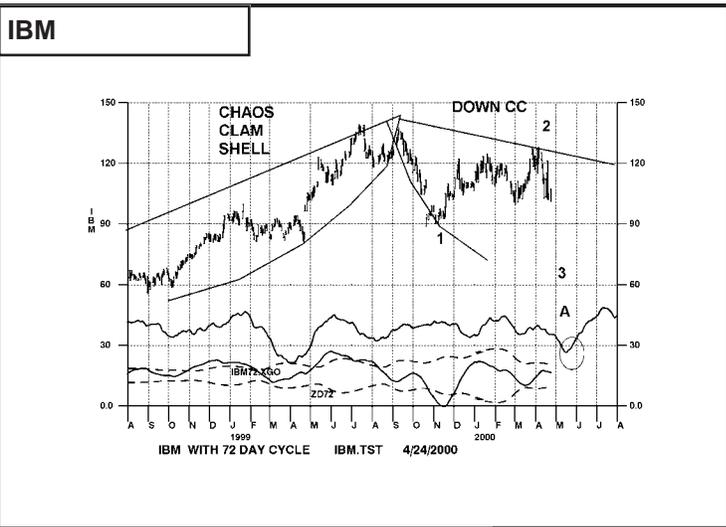

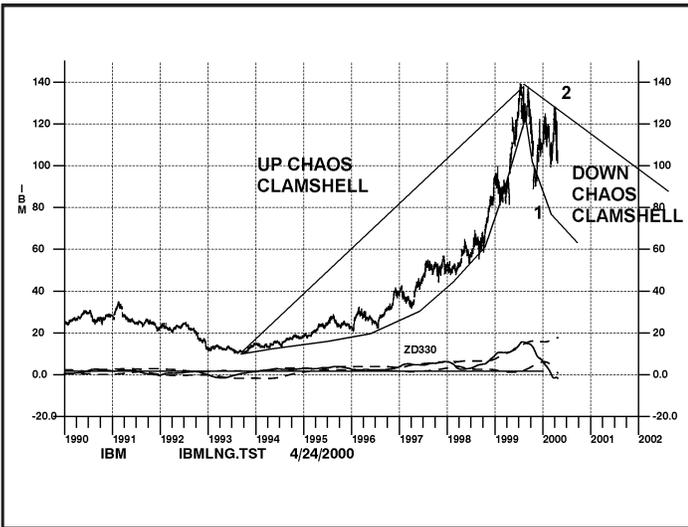

The near term chart shows the completed up Chaos Clamshell from October 1998. The move 7 rally was truly a Velociraptor blowoff. The sharp drop from the end of that Chaos Clamshell indicates that a new down CC has begun. It will take some time for this pattern to develop further. One feature to watch is the descending support line at A. Touches of that line will be buying opportunities.

Technically, we have the Dow and NASDAQ both in bear markets. This fact will most likely be obscured over the next two months by a bear market rally. I base this view on the sharp increase in the SP3.XGO energy. This is circled and marked B on the chart.

For some time I have been cautioning investors to be out of stocks. Many people were in the high flying NASDAQ technology stocks. Some of these stocks have dropped as much as 80 percent. That's not a good way to protect your retirement money.

This letter is written by Al Larson, aka Hans Hannula, full time trader, PhD (Electrical and Computer Engineering), RSA, CTA. It incorporates his original scientific research into market chaos, its causes, patterns, and trading techniques. The Chaos Clamshell shown is the unclassified version of the confidential **Hannula Market Fractal**, which is taught in his **Cash In On Chaos** course. **Hot-line updates to this letter are available daily on email as Chaos Trader's Hotline and Tomorrow's Market Hotline available for \$99/Mo., billed for 3Mos.at \$297, renewed automatically.** See page seven for more details.

**IBM has retested its all time high, and failed.** This retest was move 2 of a new down Chaos Clamshell shown on the long term chart.

The near term chart shows more detail of this pattern. We expect move 3 to complete fairly quickly, probably making its low mid-May. That is where the 72 day XGO energy makes a bottom. That is labeled as A on the chart. The rally off of that low should last about six weeks. This could be the last chance for holders of IBM to get out of this stock.

For stocks or commodities not covered in this newsletter or on the hotline, you can track the cycles and trade the Chaos Clamshells using the **Trading System Toolkit**.

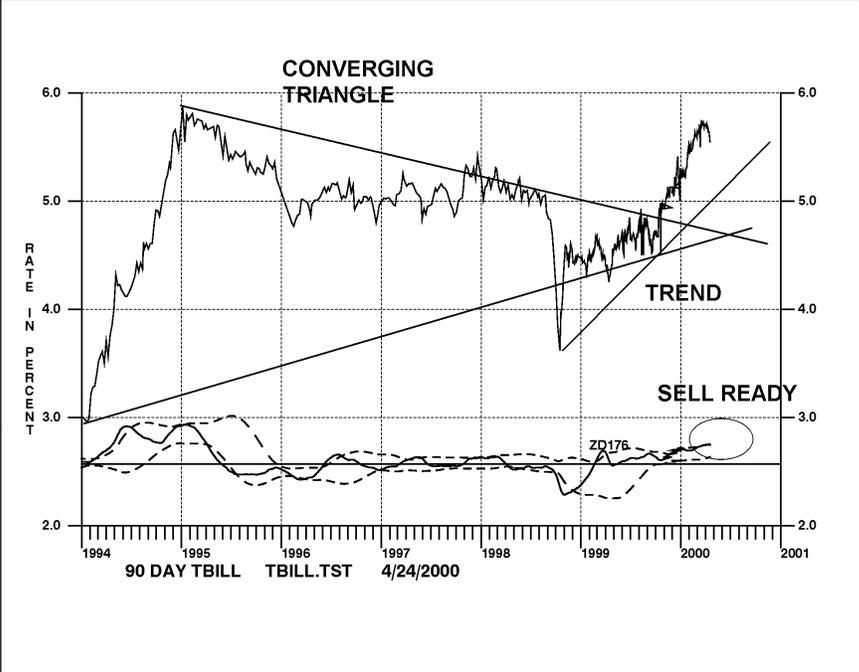

**ECONOMY/RATES**

**Interest rates appear to have made a short term high.** The chart shows that the ZD173 cycle is sell ready. After breaking out of a large converging triangle, rates have been climbing above the trend line shown. We can expect any decline in rates to stop at this trend line.

Last months sharp market drop has brought a sense of reality to the economy. Business owners are suddenly less concerned with whether their business is considered a part of the new economy or the old economy, than with the question, "What's the NOW economy?"

The NOW economy is suddenly faced with the reality that I wrote about last month. Sooner or later companies have to make money to stay in business. The sharp selloff in the NASDAQ stocks has been attributed as a message, "No more investment. Make money NOW."

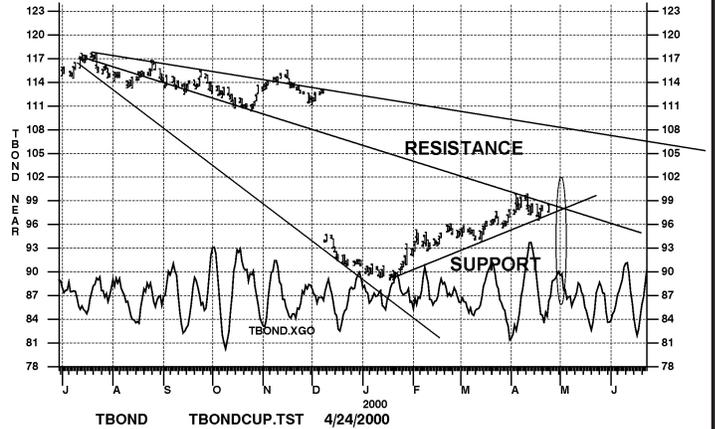

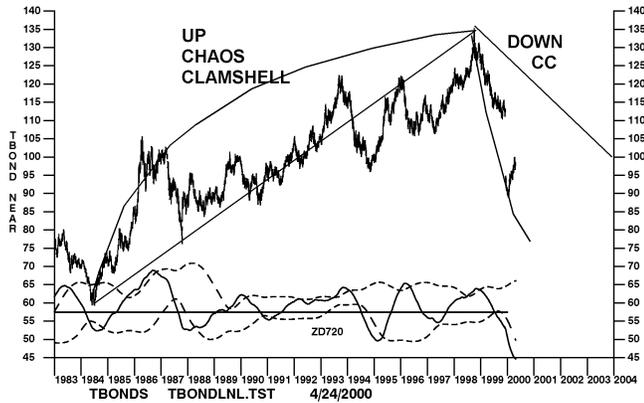

This sharp switch in investment psychology has been a long time coming. Expectations of stock returns of 25 percent per year have prevailed for the past six years. Now investors are suddenly faced with the prospect of actually losing money on their investments. While the very rich may have the fortitude to hold during a bear market, the average investor in stocks does not have the fortitude, nor the financial staying power, to do so. Unfortunately the average investor will hold their losers until near the end of the bear market and then sell them. It is better to sell now and buy the stocks back later when they are much cheaper.

**Capitalism is the worst economic system ever invented, except for all the others.**

Roy H. Williams

**TBONDS**

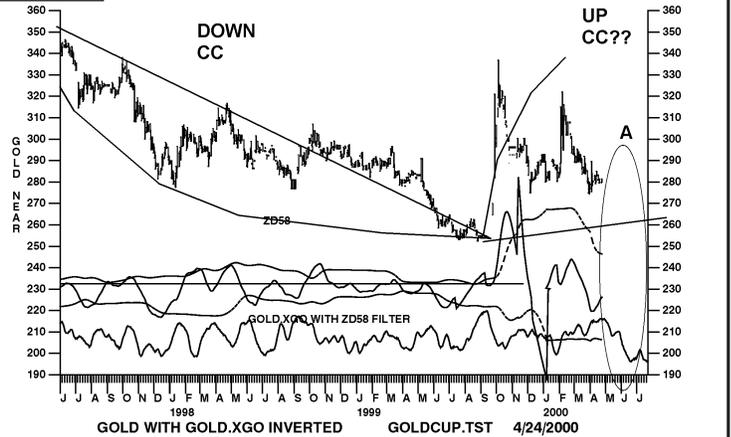

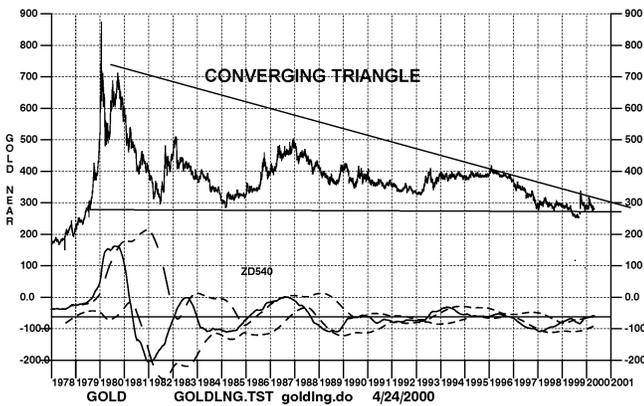

**Tbonds have continued a modest rally.** That rally now appears to be ending. However, the long term chart shows that the ZD 720 cycle is over sold. This indicator may not be reliable because of the shift in the basis of the Tbond contract with the March 2000 contract.

The near term chart shows the steady rally in Tbonds. That rally is now meeting resistance. The XGO energy curve is turning down and becoming choppy. So we expect Tbonds to decline and probably congest.

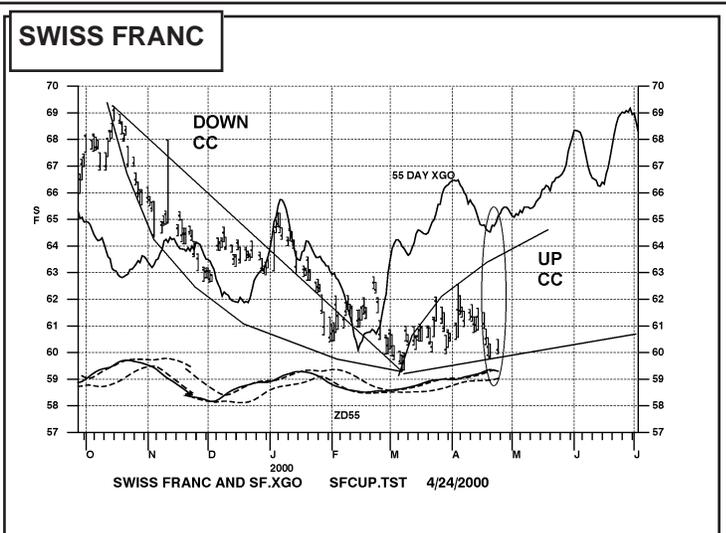

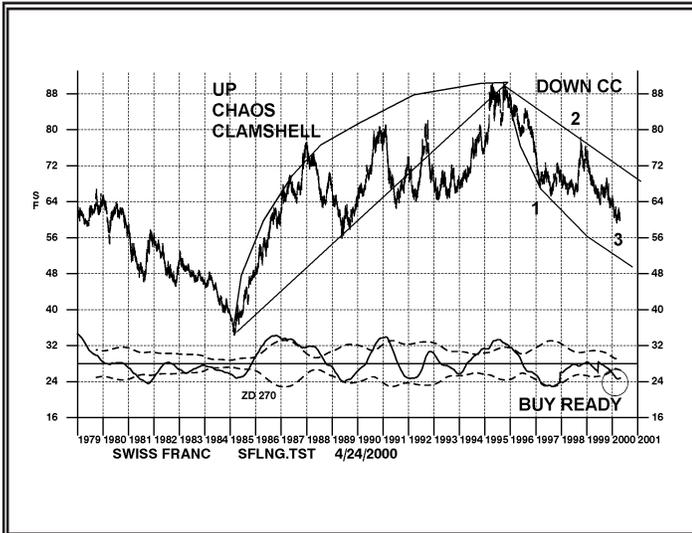

**Nothing draws a crowd like a crowd.**  
P. T. Barnum

**GOLD**

**Gold remains weak.** It appears ready to decline to retest its lows. On the long term chart, the historic support has been at 280. That support now appears to have moved down to 250. Further erosion of that support would be bearish for gold.

The near term chart shows what appeared to be the beginning of an up Chaos Clamshell. That CC would not be in move 4 and at a point where we would normally expect an upturn. However, the 58 day XGO energy cycle is down over the next two months. So it is not yet time to be buying gold. However, if it does reach its past lows be alert for a buying opportunity.

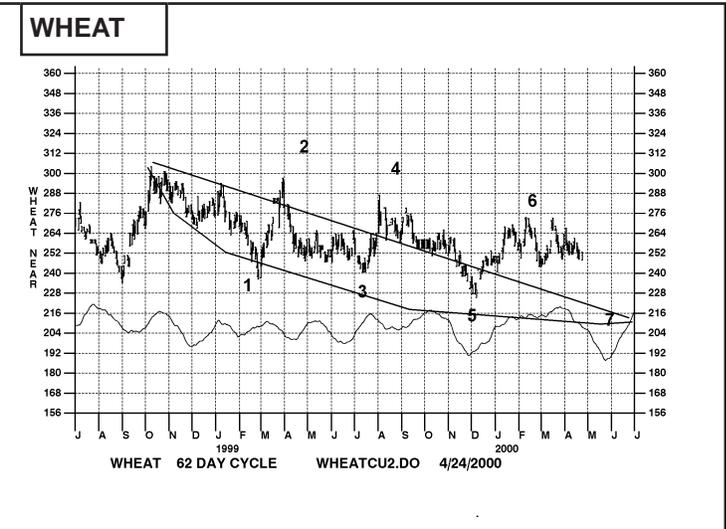

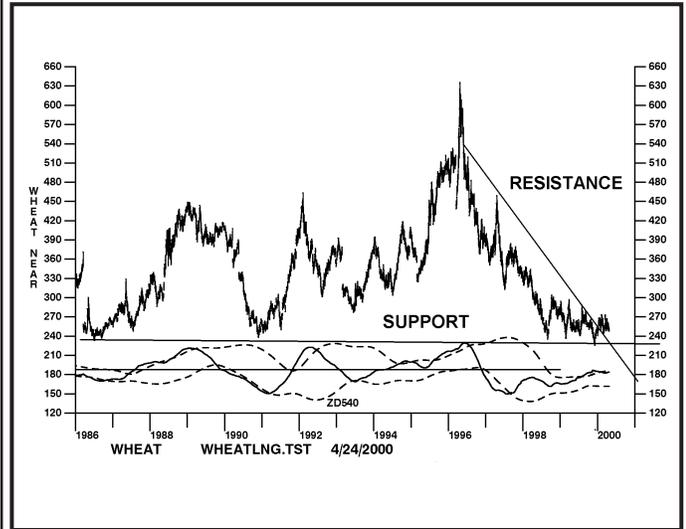

The Swiss Franc did rally into an early April high as we expected. If it can hold above its recent low, move 3 in the down CC shown on the long term chart may have ended.

The Swiss Franc is currently in a pullback from that rally. If it continues to follow the 55 day XGO it should rally off of this low. That rally should lead to a high near the first of June.

Traders are trailing a buy stop above this decline. Updates are available via our email hotline.

**The greatest mistake is to imagine that we never err.**

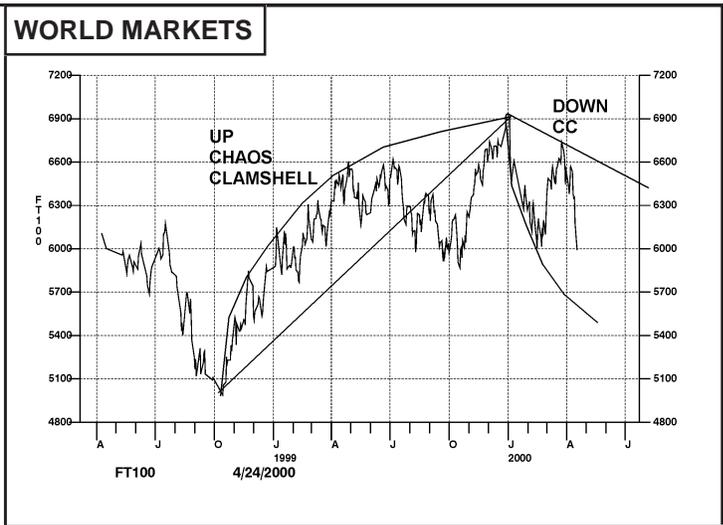

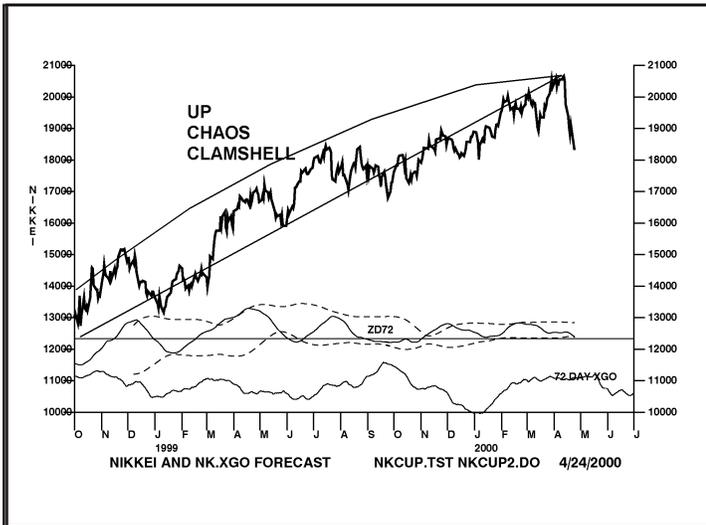

Thomas Carlyle

**Wheat is declining into a significant low.** The long term chart shows that support for this decline should come at 240.

The near term chart, however, suggests that this decline could drop to 210. This move appears to be a move 7 in a down Chaos Clamshell. Move 7's are often swift and violent. They tend to make spike highs or lows. Traders are currently short on the hotline, but we will be ready to reverse directions on a spike low.

George Bayer wrote about trading wheat using Mercury, Saturn and Jupiter. You can learn to find astrocycles with the aid of the **Trader's Ephemeris** and the **Finding Astrocycles** video-**JUST \$99.**

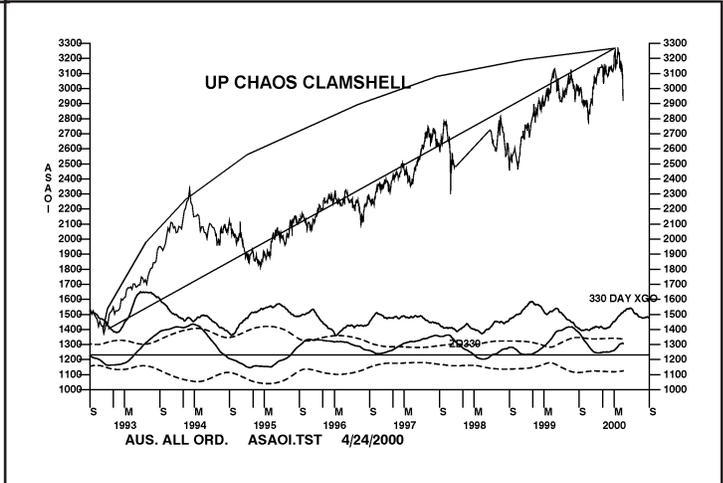

The Japanese market has ended its long up Chaos Clamshell. Its drop has taken out the previous low. A low or high will confirm a major change in trend.

The British market completed move 2 and is now in move 3 of a new down Chaos Clamshell.

The Australian market has sold sharply off of its highs. However, it has not yet made a lower low, which it must do to confirm a bear market.

So it appears that the World markets are forecasting a difficult summer for investors.

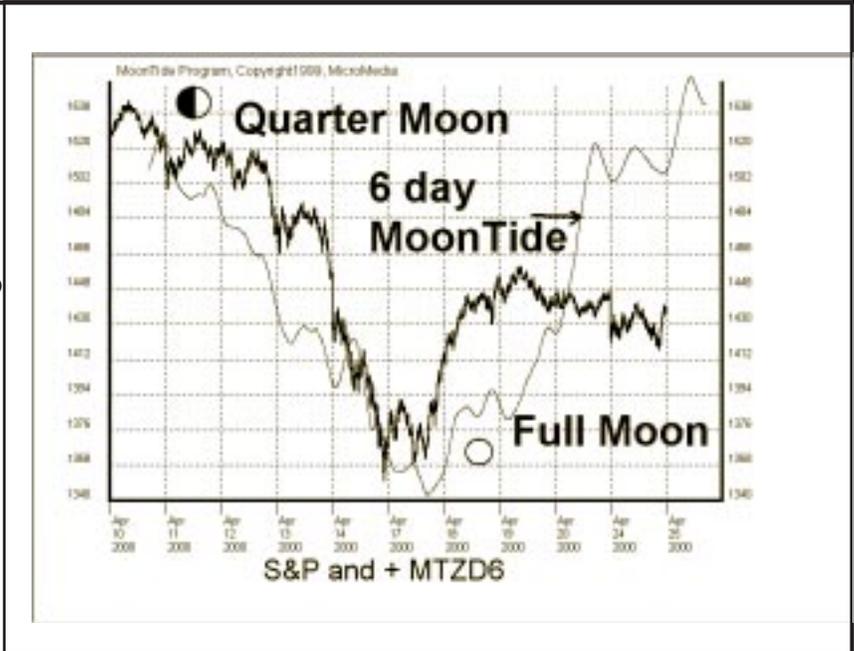

**CHAOS CLASSROOM**

Last week's dramatic plunge in the market was accurately forecast by the MTZD6 6-day MoonTide.

The chart at the right shows that energy forecast. This forecast is made by filtering our MoonTide forecast with a Zero Delay filter set to 6 days. The MoonTide forecast is computed without the use of any past price data. It uses only the date of first trade and time as its inputs. So it is quite remarkable that this forecast not only showed the slide, but forecast the low within hours.

If one watches the S&P500 long enough, one will notice the influence of the Moon just by noticing the number of times the market makes a turn near Full Moon, New Moon, or on a Quarter Moon. Its a good exercise to take a chart of the S&P and mark these Moons.

Of course, one needs to be more accurate for real trading. For that the MoonTides work well.

## ASTROPHYSICS AND CHAOS THEORY

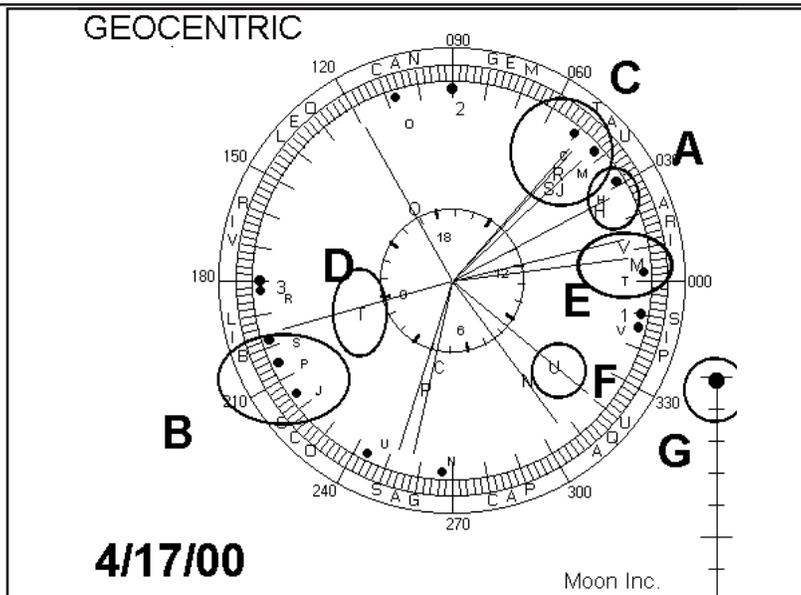

### The Drop last week was foretold by the Wheel Of Fortune.

The ephemeris wheel at the right shows much of what was going on. At A, the sun was transiting the S&P500 natal sun. It was also opposing natal Saturn, Pluto, and Jupiter. I call this cluster "The Speed Bumps." The sun transits these in October and opposes them in April. I believe that is why the biggest market drops occur in those two months. Like a car hitting bumps on a gravel road, the market goes out of control.

Meanwhile, Mars was just separating from its transit of Jupiter and Saturn at C. This pattern squared Uranus, the planet of big changes, at F.

The Moon at D was opposing Mercury and Venus, who had just transited the S&P natal Moon. This spot is always volatile when transited. The Moon's influence was further accentuated by its inclination, shown at G, which was peaking.

All these effects together added a lot of energy into the system. That accounts for the wide range of the drop.

## ENERGY **Last month I wrote about the importance of increasing your energy in order to trade well.**

One way to do that is to use my **Energy Charging Kit**. Another way to do that is through traditional meditation. A great way to do that is to combine the two. I have found the following meditation "warm-up" very powerful. It came to me while meditating.

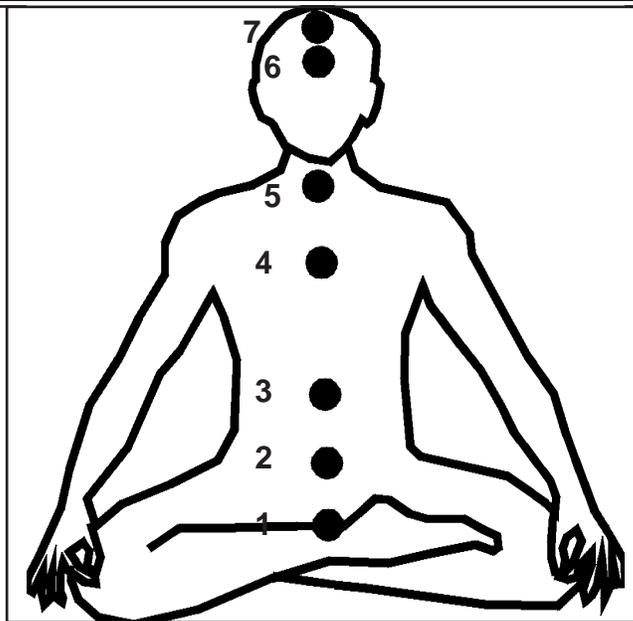

I set up the **Energy Charging Kit**, sit in the lotus position, and clear out my chakras with this warm up.

For each chakra (shown on the drawing at the right),

A: Imagine a green laser light drawing a horizontal circle counter clockwise through the chakra, circling in front of you. Mentally follow the light as it makes 3 circles, breathing in the right nostril as the beam passes to your right, and out the left nostril as it returns on your left. On each successive pass, think "Cleanse", then "clean", then "clear." Breathe through your belly, slowly.

B. Imagine a blue laser light drawing a horizontal circle clockwise through the chakra. Mentally follow the light as it makes 3 circles, breathing in the left nostril as the beam passes to your left, and out the right nostril as it returns on your right. On each successive pass, think "Enrich, empower, enliven." On the 7th chakra, add one more pass with "Enlighten."

Make three passes up the chakras-then enjoy the rest of the meditation.

## QUALITY IMPROVEMENT

Our quality improvement work this month focused on updating our product descriptions and catalogs. It is the curse of the modern age that these descriptions existed in paper form, in several different files on our website, and in descriptions hosted on the Stocks & Commodities website. It is not unusual for these multiple copies of the same information to become outdated. We have now updated all copies of our product information, so we hope you will find it more usable.

As part of this update we have discontinued our voice Hotlines with the advent of Internet e-mail, most of our customers have preferred that mode of delivery. That has made our 900 service obsolete.

Some of you may have had mail to us returned by the Post Office. Our Post Office has hired one or more idiots recently. On their own they decided that our mailbox was not correctly labeled or they did not have some form or other, so they started returning mail to senders. It didn't seem to matter that we have used this same Post Office box for 17 years. We think we have the problem fixed, but if you get mail returned from us, please let us know.

## PEOPLE AND HAPPENINGS

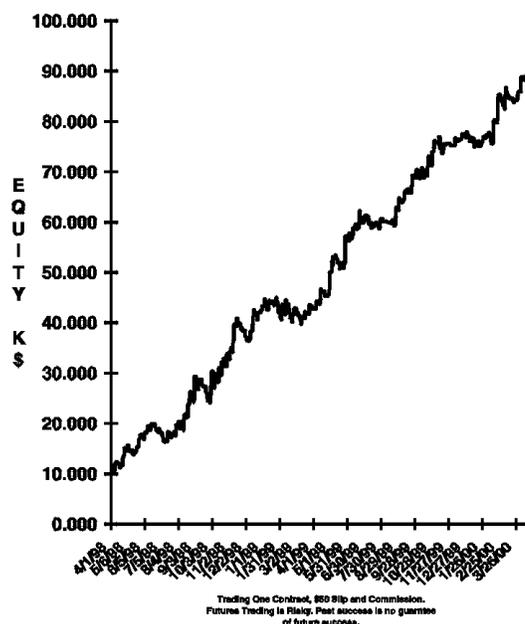

This has been a fairly quiet month, despite the market chaos. I do appreciate the many phone calls and emails. I am a little behind on emails, so if you are waiting for a reply please be patient.

I especially enjoyed a visit with trader JT. JT is a professional trader whom I have known for many years. Every time I visit with him I am impressed by his calm approach to trading. Nothing seems to rattle him. It's that calm composure that makes him good.

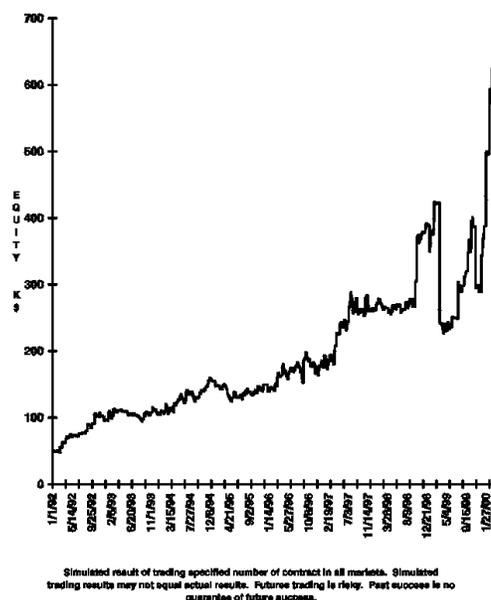

It will soon be vacation time, and many of you will be taking a little time off. When you do so, plan a restful vacation. Leave the markets behind and give your tired brain and body and spirit a rest. That will be the best way to prepare for an exciting fall. (note: I did not say crash.)

All for now.

### MOONTIDE ONE-A-DAY EQUITY

### HOTLINE POSITION TRADING TRACK RECORD

We did purge addresses last month. If this is a sample newsletter, you will stay on our list until purged. The date after your name tells you the last month you will receive unless you renew. **Renewals are \$240/year.** Renew now. **I do take 3 month and 6 month renewals as well.** Just pro-rate the cost. **Call 303-452-5566 with your renewal.** Visa and Mastercard taken.

The **Cash In On Chaos Newsletter** (formerly the Market AstroPhysics Newsletter) is published 12 times per year, between the 1st and the 25th of the month. Subscriptions are \$250 per year or \$300 to include subscription to the AstroDow and Astropoint timing service. We may or may not hold securities mentioned. Sources of information are believed to be reliable, but are not guaranteed. Opinions and recommendations are given with the understanding that our sophisticated investors are aware of the risks involved. Past success is no guarantee of future success. Simulated trading results may over or understate actual results. MAP Newsletter is written and published by Dr. Hans Hannula, PhD, RSA, CTA. 303-452-5566, fax 303-457-9871 MicroMedia (The Chaos Mint), Box 33071, Northglenn, CO 80233. Mastercard, Visa accepted. Hotline available daily (Chaos Trader's Email or Tomorrow's Market Email). Just \$99/Mo, billed for 3mos @ \$297, renewed automatically. Sign up at: <http://www.cashinonchaos.com/hans>

**Your Electric Life, Science for a New Age**  
 by Dr. Al Lason, Ph.D. (aka Dr. Hans Hannula)

Whether you realize it or not, you are being strongly influenced by a very powerful electrical force - the earths electric field. This field produces currents through your body that are 250,000 times as strong as the currents that run your brain. Recognition of this fact, research, and experimentation have led former Bell Labs engineer and scientist Al Larson to a series of insights into many previously unexplained phenomena. His findings cover a wide range of topics, such as dowsing, the human aura, consciousness, bio-circuits, Feng Shui, natal astrology, stock markets, remote viewing, energy field medicine, de ja vu, dreams, and religious experiences. His own discovery of *sudden impulses* \*shows how we are all connected by the field in a *Cosmic Internet*\*. Al provides a rational explanation of how these phenomena work through the earths electric field, along with guidance of how this knowledge can be used to improve your own life. Do not miss this clear, concise, convincing explanation of how things work.
