*Stocks have rallied to the 936 head and shoulders neckline and met resistance. Tbonds continue to rally. IBM rally top. Economy provides a gloomy Christmas. Swiss Franc rolls over. Gold working to move up. Wheat ending its rest. Nikkie is sickie. Master Clock 2003. Rising Signs 2003. 2003 forecast.*

### STOCKS

The S&P 500 has rallied to the 936 neckline of the massive head and shoulders shown on the long term chart. For the past three trading days the bulls made five attempts to run prices above this neckline. So far they have been repelled.

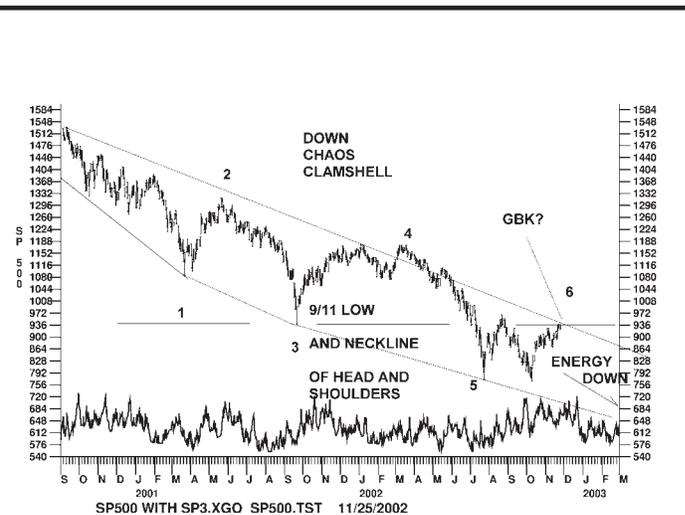

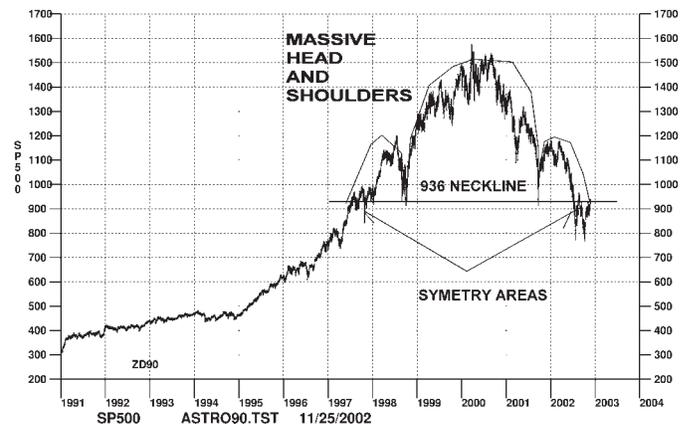

The long term chart is showing a symmetric pattern. The current price action is a time mirror image of late 1997. If this mirrored pattern holds, the market could decline further over the next three years.

The near term chart shows a more optimistic view. This chart shows what looks to be a down Chaos Clamshell from the September 2000 top. That pattern shows a fairly clear 6 moves. That sets it up now for a move 7 down into the first quarter of 2003.

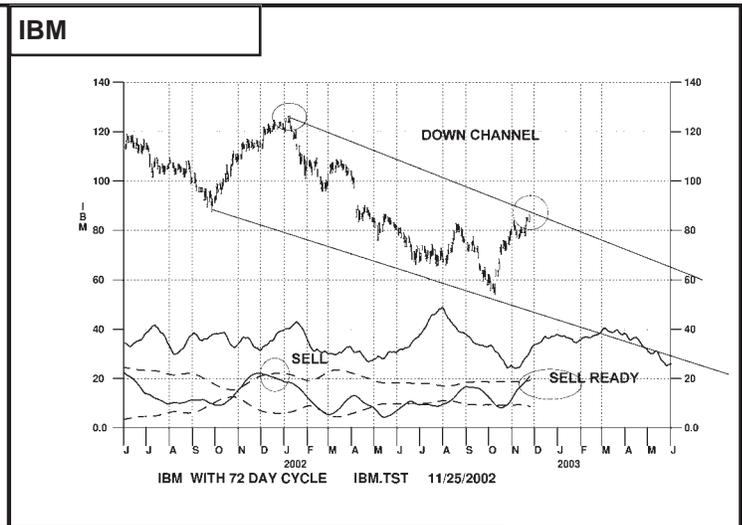

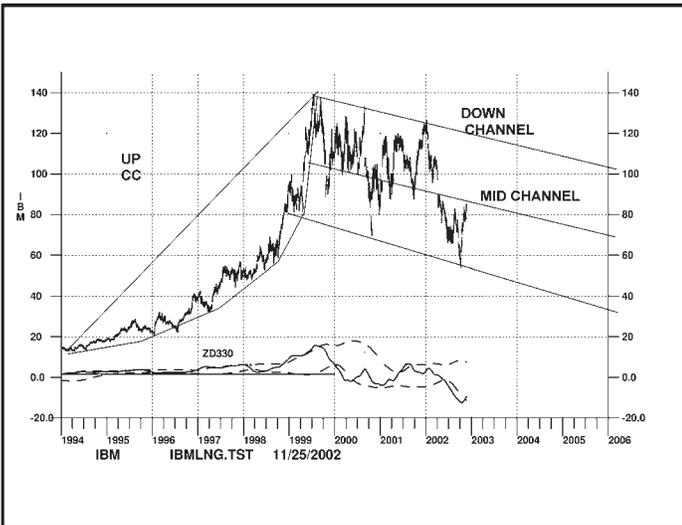

The rally back to the 936 neckline is also a rally to the support provided by the low that followed the 9/11 terrorist attack. One of the oldest rules in trading is that support once broken, becomes resistance. It is very common for prices to return to a former support level, touch it, give it a Good-Bye Kiss (GBK), and then head south.

Further support for this view is that the SP3.XGO energy has now peaked and is headed down.

Again, this is not a time to be an investor in stocks. Hopefully, by the end of the first quarter next year there will be some good investments available.

This letter is written by Al Larson, aka Hans Hannula, full time trader, PhD (Electrical and Computer Engineering), RSA, CTA. It incorporates his original scientific research into market chaos, its causes, patterns, and trading techniques. The Chaos Clamshell shown is the unclassified version of the confidential *Hannula Market Fractal*, which is taught in his *Cash In On Chaos* course. **Hot-line updates to this letter are available daily on email as Chaos Trader's Hotline and Tomorrow's Market Hotline available for \$99/Mo., billed for 3Mos.at \$297, renewed automatically.** See page seven for more details.

**IBM has reached the mid-channel of the down channel shown on the long term chart, as forecast last month.**

The near term chart shows the 72 day XGO cycle in a sell ready state. This does not mean that IBM will immediately sell off, but its energy cycle does turn down in January and again in March through May of next year.

For stocks or commodities not covered in this newsletter or on the hotline, you can track the cycles and trade the Chaos Clamshells using the **Trading System Toolkit**.

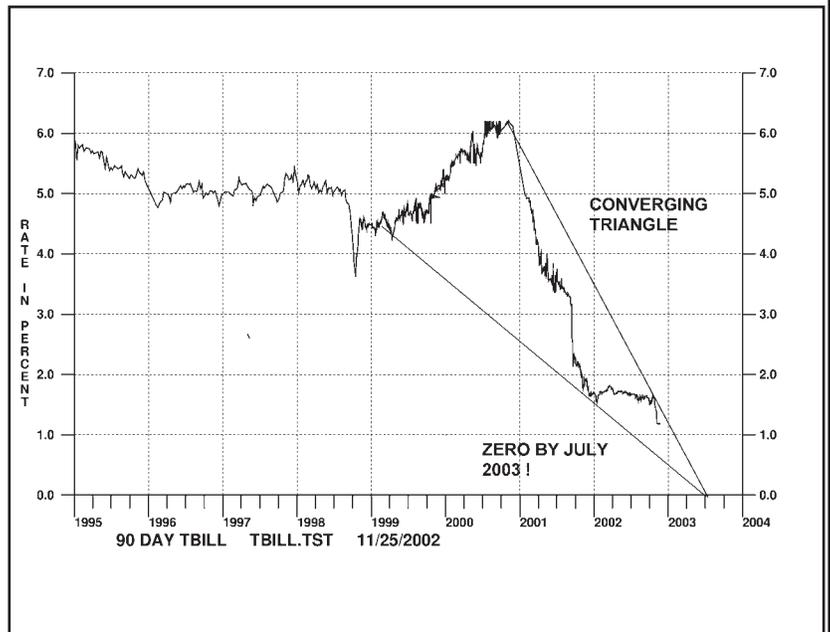

## ECONOMY/RATES

**The Federal Reserve cut rates again this month.** They surprised many people by cutting rates a full half of a point. This pushes interest rates to the lowest they have been since the 1930's. Interestingly enough, if one draws the obvious converging triangle on the interest rate chart, rates will reach zero percent by next July. **FREE MONEY!**

In his last testimony to congress, Alan Greenspan said that the economy was in a "soft spot." That is Fedese for "between a rock and a hard place." If one assumes that a quarter point rate cut is the size of one bullet, Mr. Greenspan has fired twenty bullets and has five left. Things are looking a little dicey. I noticed an interesting line in his testimony where he warned that, "We think the economy is improving, but we can't be sure." I don't think I have ever heard Alan Greenspan admit to not understanding what is going on. Kind of scary.

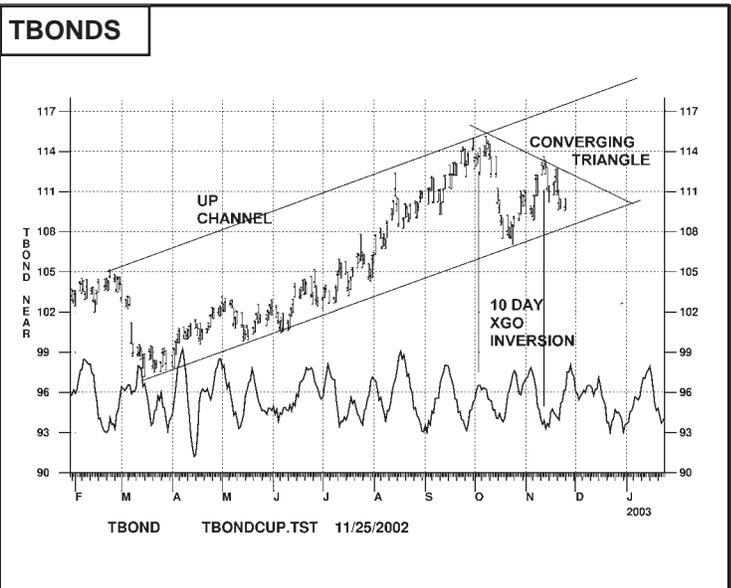

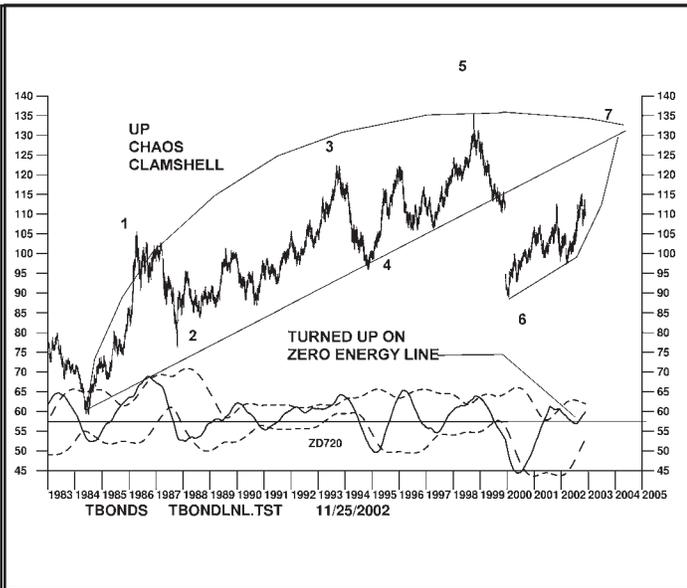

What is going on across America is that food banks, shelters, and family assistance centers are suddenly being hit with the heaviest demand for assistance EVER. Douglas County, Colorado, is one of the wealthiest counties in the country as well as the fastest growing. Many people there have lost jobs, and are asking for help just to make their mortgage payments. Many of the homes in Douglas County are valued well over 1 million dollars. The Douglas County assistance fund has exactly \$5,000 to distribute through next February. That is, indeed, "between a rock and a hard place."

Do what you can this year to help those in need. Give generously to your favorite charity. If you don't have one, see our page prosperity at [www.moneytide.com](http://www.moneytide.com).

**Tbonds are congesting sideways in their major up trend.** The long term chart shows the progress in move 7 in the large up Chaos Clamshell.

The near term chart shows the up channel in T bonds, which remains intact. The 10 day XGO pattern has inverted this month. That means that the high it shows now is probably a low. Watch for a rally in December.

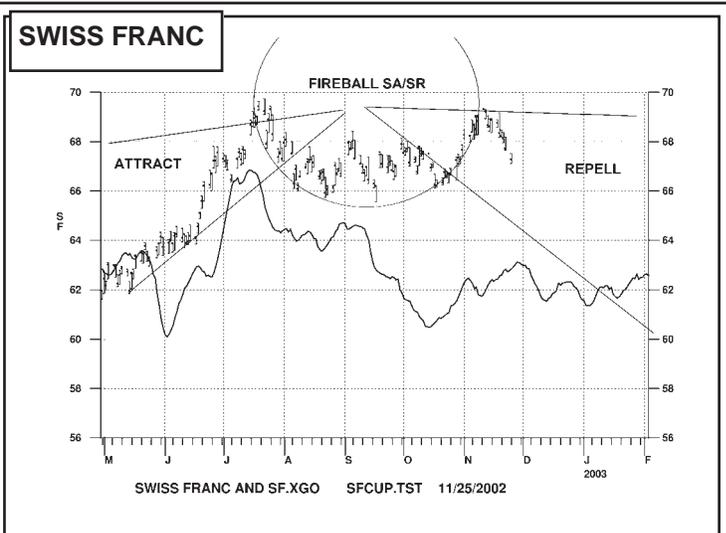

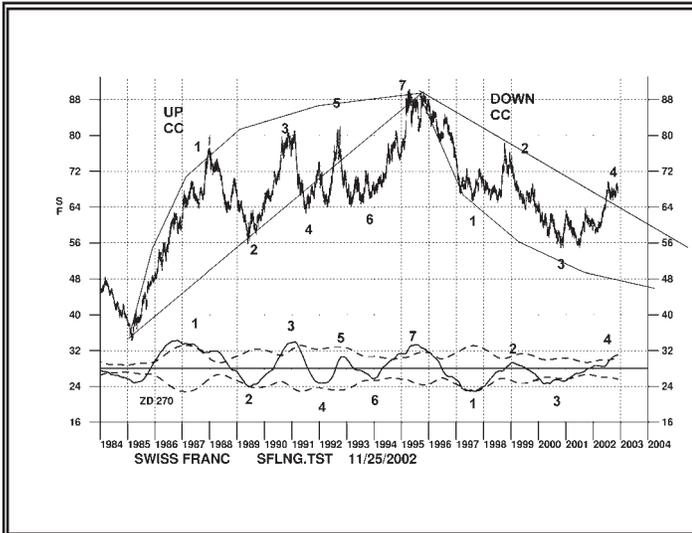

**When you cease to dream you cease to live.**

Malcolm Forbes

**Gold continues to look bullish.** It is holding above the 300 price level. This was a key support price in gold in the 1980's and was not broken until 1997. Now that prices have climbed back above it, it again becomes a significant support level. This is marked on the long term chart.

The near term chart shows the continued formation of the bullish cup and handle pattern. The handle appears to be move 4 of an up Chaos Clamshell. I expect gold to break above 330 and continue its bull market. That rally may not come until early next year. Whenever it comes, it will attract a large following. I am not so naive as to believe that I am the only one that sees this cup and handle pattern.

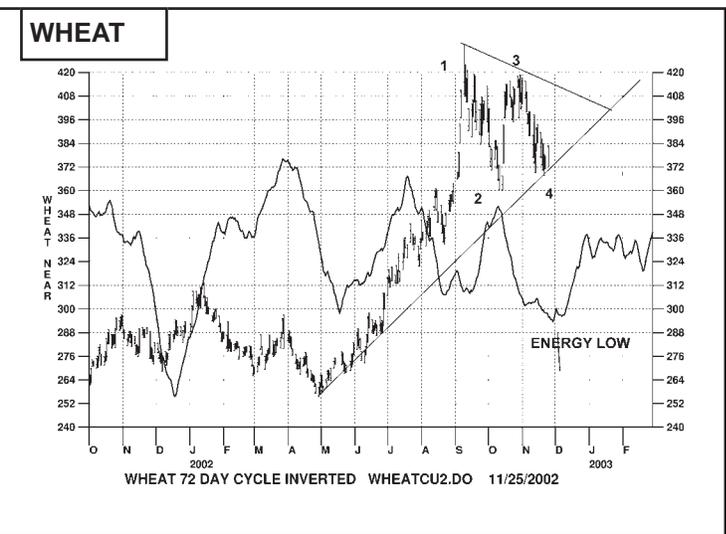

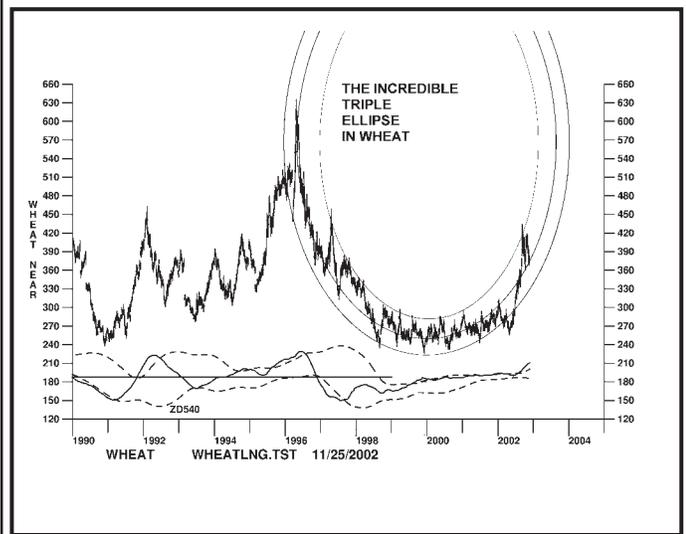

**The Swiss Franc has turned south.** The long term chart again seems to be showing an up Chaos Clamshell and a down Chaos Clamshell. It looks like move 5 of the down Chaos Clamshell is just beginning. The ZD270 cycle filter is confirming the 7 moves in the up CC, and the 4 moves so far in the down CC. That cycle is now sell ready.

The near term chart shows a huge Fireball. This is a chaotic Strange Attractor/Strange Repellor. Prices are attracted into the Fireball, skirt around it, and are repelled away from it. This implies much lower prices for the Swiss Franc.

**Cherish your visions and your dreams as they are the children of your soul; the blueprints of your ultimate achievements.**

Napoleon Hill

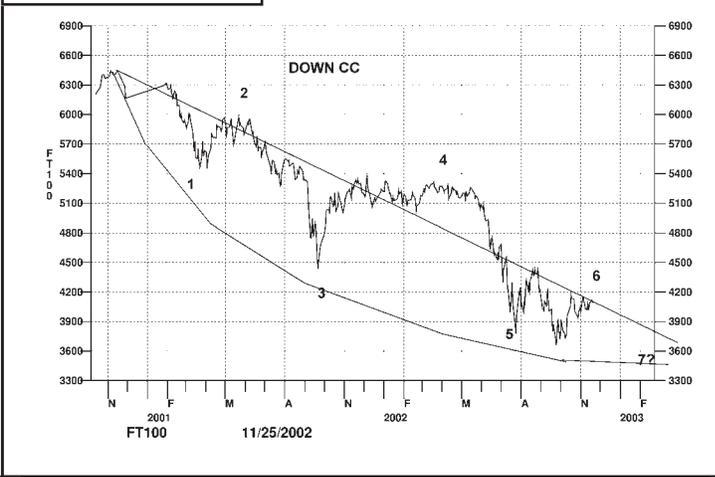

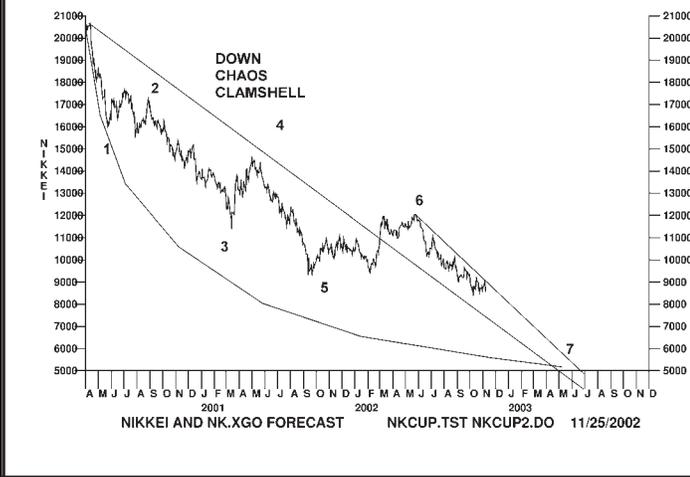

**Wheat has rested and is ready to rock and roll.** It has found support on the middle ellipse in the *The Incredible Triple Ellipse in Wheat*.

The near term chart shows a strong thrust followed by a move 2, 3, and 4 in what looks to be a fast up Chaos Clamshell. The 72 day energy cycle is bottoming. So wheat looks like it is set to fly.

George Bayer wrote about trading wheat using Mercury, Saturn and Jupiter. You can learn to find astrocycles with the aid of the **Trader's Ephemeris** and the **Finding Astrocycles** video-**JUST \$100.**

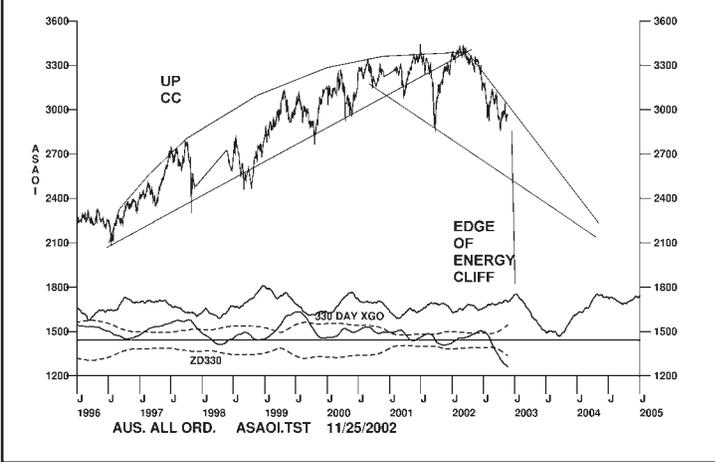

**WORLD MARKETS**

**The Japanese market continues heading for the South Pole.** This market has reached new lows, but not the bottom.

**The British market looks just like the US market.** It looks to be set for a move 7 down.

**The Australian market is down, but headed lower.** It is now on the edge of the energy cliff that runs into late next year. Hold on to your hats, Mates.

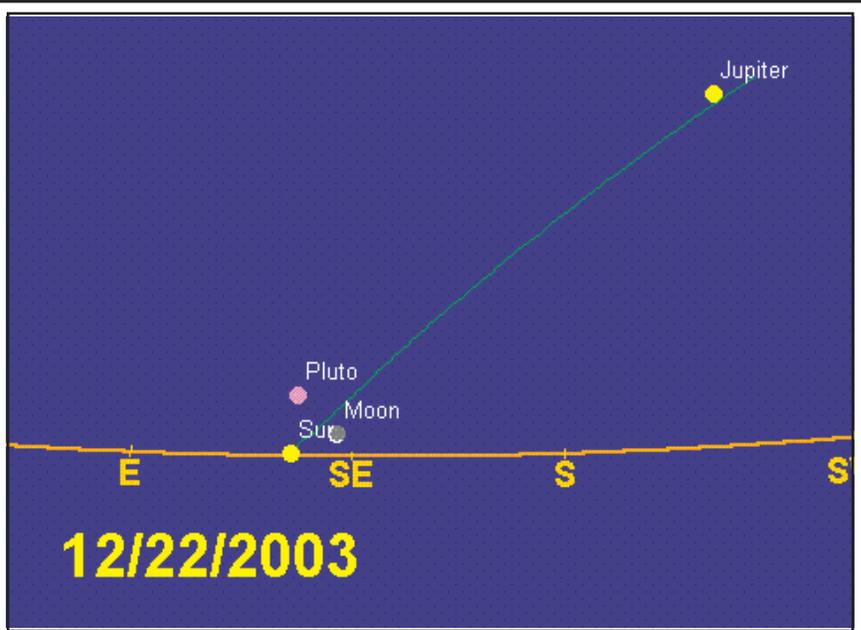

**CHAOS CLASSROOM**

**On Moneytide.com, in the Chaos Classroom, I have many pages about the effects of rising signs.** Rising signs fascinated ancient astronomers in China, India, Babylon, and Egypt. These signs appearing in the pre-dawn sky were taken as omens for that day. They often give you good clues about the behavior of the market for that day.

An easy way to find these signs is to use a program called Cybersky. It allows you to create a picture of the sky as it will appear if you go outside and look. A picture produced by it is shown to the right. This shows Pluto and the Moon forming a rising sign December 22, 2003.

Rising signs for the next year are:  
 12/1/02-V,R,T; 12/30-31/02-V,R,P,T;  
 1/28-29-31/03-V,R,P,M,T;  
 2/26-31/03-P,R,V,N,M,U; 3/29/03-V,U,T; 4/28/03-V,T; 5/28-29/03-V,M,T; 6/28/03-V,M,S,T; 7/28/03-V,T; 8/27/03-J,T;  
 9/24/03-J,M,T; 10/25/03-J,M,T; 11/23/03-Just Sun; 12/22/03-P,T. The letters indicate the planets, M for Mercury, V for Venus, etc. T is the Moon. Watch these dates for volatile moves.

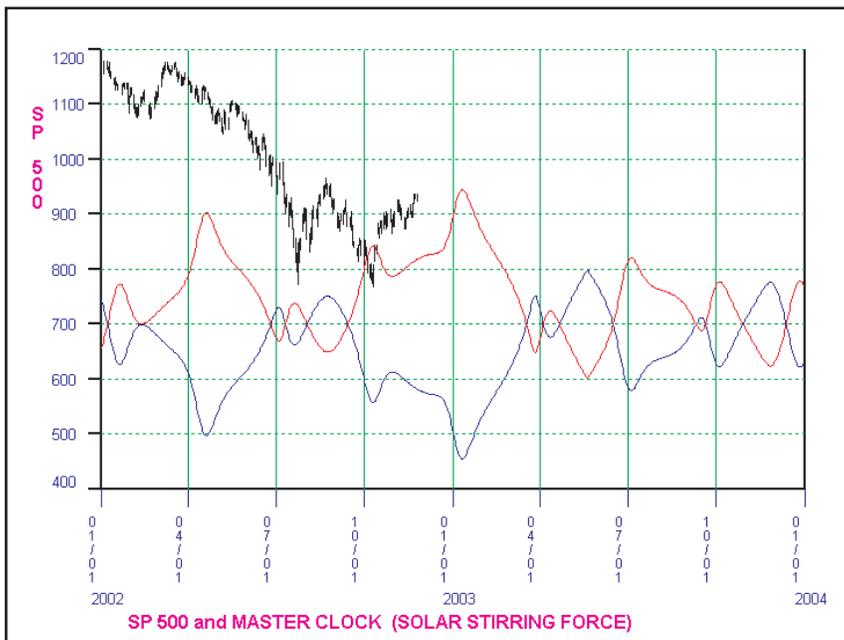

## ASTROPHYSICS AND CHAOS THEORY

This is a chart of the Master Clock for 2003. The Master Clock is explained in my article, "In Search of the Cause of Cycles" included in *Market Astrophysics and Chaos*, available in the Estore at Moneytide.com.

As the planets move about the Sun, they stir up tidal waves in the gases. These tidal waves produce solar flares, coronal holes, and mass ejections. All of these change the amount of energy flowing from the Sun to the Earth. The Master Clock is an approximation of the amount of such variable energy.

As the energy reaches the Earth, it creates changes in the voltage on the ionosphere. This in turn changes the amount of electrical current flowing through traders. It influences the emotion with which they trade. These variations thus show up in market prices.

Major turns in the stirring force often show up as major turns in markets. Sweeping moves often show up as sweeping moves in markets. For example, 5/20/2002 through 7/20, 2002 was a sweeping move in the Master Clock-and in the S&P 500. A similar sweeping move occurs in the first three months of 2003.

No legacy is so rich as honesty.

William Shakespeare

## ENERGY

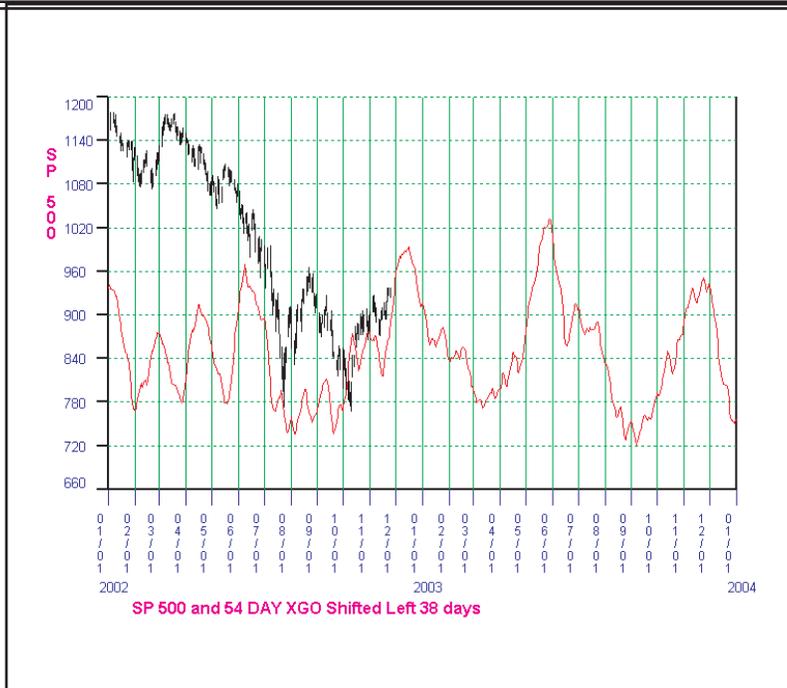

This chart is an energy forecast for the S&P for 2003.

This energy forecast is produced from the S&P's XGO energy function. Every market and individual has an energy function. This is a computation of the energy received by the market or person from the universe.

The XGO energy function is the input to the person or market. In the case of a market, the output is price. A crude simulation of the dynamics of the market can be made by filtering the XGO energy function with a Zero Delay Filter of a particular length. Sometimes this produces an energy pattern which needs to be shifted left or right.

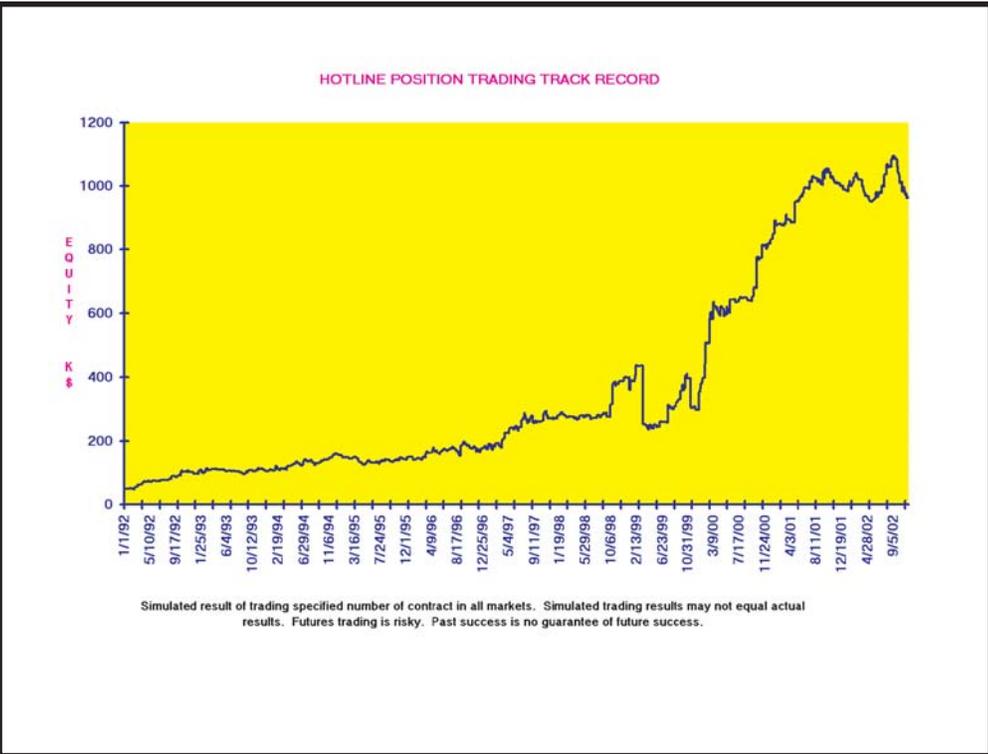

The function shown on the chart is a 54 day XGO shifted left 38 days. For the past two years it has done a fairly decent job of finding some tradable market turns.

This forecast is showing a very strong seasonal pattern next year. This suggests that investors will be looking to the quarterly reports for signs of profitability, more than in previous years.

**QUALITY IMPROVEMENT**

**Quality Improvement this month is focused on laying the groundwork for moving our Moneytide.com server into our office.** This server is currently located in Boulder, about 25 miles away. That server is also over five years old and our Moneytide.com is a static HTML site. We will be moving that site to a server in our office and reprogramming much of it to make it a dynamic site. This will allow things like you changing your own email address, look up of quotes, and online authorization for access to our coming online newsletter. Stay tuned.

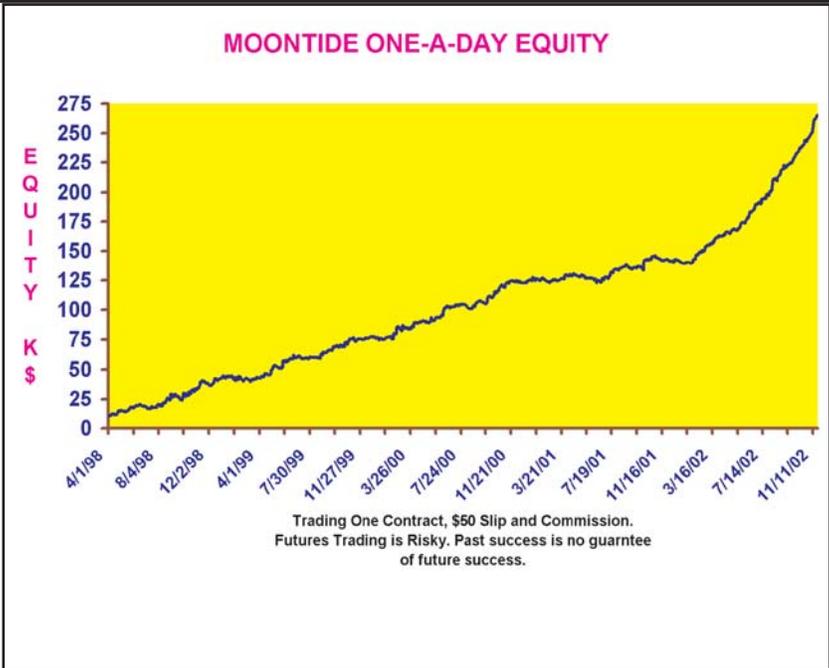

**PEOPLE AND HAPPENINGS**

**This has been a very busy month with many phone calls and emails.** We think we have answered all of your inquiries, so if we have somehow missed yours, let us know. I sincerely appreciate your interest in my work.

This is the time of year when the Holiday Season begins to preoccupy everyone. It is also a time when the Earth cools down in the Northern Hemisphere. So the markets cool down and the volatility decreases. This seasonal effect requires that you be less aggressive in your trading, so as not to give back the money you made this year. So be careful.

Also, plan a safe and happy Holiday Season for yourself. All for now. See you next month.

We did purge addresses last month. If this is a sample newsletter, you will stay on our list until purged. ### Your Electric Life, Science for a New Age

by Dr. Al Lason, Ph.D. (aka Dr. Hans Hannula)

Whether you realize it or not, you are being strongly influenced by a very powerful electrical force - the earth's electric field. This field produces currents through your body that are 250,000 times as strong as the currents that run your brain. Recognition of this fact, research, and experimentation have led former Bell Labs engineer and scientist Al Larson to a series of insights into many previously unexplained phenomena. His findings cover a wide range of topics, such as dowsing, the human aura, consciousness, bio-circuits, Feng Shui, natal astrology, stock markets, remote viewing, energy field medicine, de ja vu, dreams, and religious experiences. His own discovery of *sudden impulses* \*shows how we are all connected by the field in a *Cosmic Internet*\*. Al provides a rational explanation of how these phenomena work through the earth's electric field, along with guidance of how this knowledge can be used to improve your own life. Do not miss this clear, concise, convincing explanation of how things work.
